

Automated Wall-Mount Thermal Pool Cover Reel

The S.R.Smith Automated Wall-Mount Reel offers easy operation and unobstructed deck space by storing the thermal covers on the wall.

- **Easier Installation**
 - › No need to mount a separate device to control movement of your thermal cover - instead, the motor is concealed within the tubing and only requires a standard power cord be plugged into a 110 outlet.
- **Automated Operation**
 - › With the touch of a button, staff can easily cover and uncover the pool using a handheld remote.
- **Keep the Deck Clear**
 - › Remove the storage reel from the deck and make more room for swimmers by installing the cover system on the wall instead.
