Date: August 20, 2012

**Subject: Summary Report of Swimming Pool Lift Tests per ADA 1009.2
SR Smith model no: 385-0000, Extended Reach Hi/Lo Aquatic Lift.**

This summary contains the limited results of the detailed report that was prepared as an outcome of the testing performed on a sample of swimming pool lift **SR Smith model no: 385-0000, Splash Extended Reach Hi/Lo Aquatic Lift** which was tested according to the American's with Disabilities Act (ADA) standard 1009.2. All the tests were performed under simulated pool environment and on site at SR Smith, LLC facility, located in Canby, Oregon.

Scope of the Testing (Work)

The testing was conducted under simulated pool environment to ascertain that the pool lift (tested in as-mounted condition by SR Smith) complied with ADA Standard 1009.2.

Mounting Apparatus

A platform made of plywood simulating a typical pool deck was set up by SR Smith, and was used to mount the pool lift. The pool lift to be tested was mounted into a simulated concrete instillation at a typical installation distance (18" on center) to the simulated pool wall.

Tests Conducted and Measurements Made

A test protocol to include all the measurements and tests as detailed in the standard was prepared and tests were performed by strictly following the standard protocol and by using calibrated instruments. All the measurements (where applicable) were performed by using the deck to mimic the pool, and the lifts mounted on it.

Section 1009.2.1 – Scope of the test: Pool Lift Location (not conducted)

Section 1009.2.2 - Scope of Test: Seat Location.

Section 1009.2.3 - Scope of Test: Clear Deck Space.

Section 1009.2.4 - Scope of Test: Seat Height.

Section 1009.2.5 - Scope of Test: Seat Width.

Section 1009.2.6 - Scope of test: Footrests and Armrests.

Section 1009.2.7 - Scope of Test: Operation.

Section 1009.2.8 - Scope of Test: Submerged Depth

Section 1009.2.9 - Scope of Test: Lifting Capacity

Table 1: Testing Results Data for Lift #6: Splash ER Hi-Lo 385-0000

ADA Req.	Test Details	Observation	Req.	Pass	Fail
1009.2.1	Pool Depth at Installation Location	***	≤48 inches		
1009.2.2	Edge of Pool to Centerline of Seat Distance when Raised	18 inches	≥16 inches	X	
1009.2.2	Deck Slope-Edge of Pool to Centerline	***	≤1:48		
1009.2.3	Clear Deck Space Width	-	≥36 inches	X	
1009.2.3	Clear Deck Space Length from 12 in Behind Rear of Seat	-	≥48 inches	X	
1009.2.3	Deck Slope-Clear Deck Space	***	≤1:48		
1009.2.4	Seat Height from Deck to Top of Seat Surface when Raised	38 inches maximum	16-19 inches	X	
1009.2.5	Seat Width	18 ½ inches	≥16 inches	X	
1009.2.6	Footrests Provided (y/n)	Yes	Yes	X	
1009.2.6	Footrests Move with Seat (y/n)	Yes	Yes	X	
1009.2.6	Armrests Provided (y/n)	-	NR		
1009.2.6	Armrest on Side Opposite Water Removable (y/n)	-	Yes*		
1009.2.6	Armrest on Side Opposite Water Folds Clear of the Seat (y/n)	-	Yes*		
1009.2.7	Pool Lift Operable from Deck Level (y/n)	Yes	Yes	X	
1009.2.7	Pool Lift Operable from Water Level (y/n)	Yes	Yes	X	
1009.2.7	Controls and Operating Mechanism Unobstructed When Lift is in Use (y/n)	Yes	Yes	X	
309.4	Operable Parts Operable with One Hand (y/n)	Yes	Yes	X	
309.4	Tight Grasping Required (y/n)	No	No	X	
309.4	Pinching Required (y/n)	No	No	X	
309.4	Twisting of the Wrist Required (y/n)	No	No	X	
309.4	Force Required to Activate Button Less than 5 lbs (y/n)	0.90lb 0.80lb 1.30lb 1.10lb	≤5lb	X	
1009.2.8	Depth of Seat Submersion	31 ½ inches	≥18 in	X	
1009.2.8	Depth of Seat From Deck	37 ½ inches	≥18 in	X	
1009.2.8	Edge of Deck to Centerline of Seat Distance when Lower	***	NR		
1009.2.9	Lift Sustains Static Loading of 450 lbs or 1.5 x Rating (y/n)	450lb	Yes	X	

Notes: Rated for 300 lbs

*If armrests are provided they must be either removable or able to fold clear on side opposite water.
**Armrest is removable by removing screws. ; NA – Not Applicable; NR – Not Required
***Item being a pool specific requirement was not tested.
+ Req = Requirement

Results: Swimming Pool Lift, Instrument #6, model number 385-0000, SR Smith Splash Extended Reach Hi/Lo Aquatic Lift, in the simulated pool environment was found to pass all tests that were performed.

Comment: SR Smith Sample Model No 385-0000 passed the tests as identified in the above table.

This summary report is based on the full report which contains the details of the tests conducted on the identified model and as supplied by SR SMITH, LLC presents the outcome of the testing performed by MEIC. This summary is not a substitute for the full report.

A copy of the full report is available to all SR SMITH Prospective and Current customers from MEIC at a nominal cost. You may order your copy at www.meic.com directly.
