

BETTER TOGETHER.

**TECHNICAL  
GUIDE**  
2019 SEASON

## COMBINED **STRENGTHS**

S.R.Smith and Inter-Fab bring over 100 years of pool industry expertise to product development, manufacturing, and operations as they join to form an industry leading manufacturer of residential and commercial pool deck equipment. The shared heritage of technical expertise and creative thinking will benefit pool professionals, delight pool owners and help grow the pool industry.

## BETTER SERVED **BUILDERS**

S.R.Smith has expanded to four manufacturing facilities with several hundred employees producing a broad array of high quality products. This expansion provides greater flexibility and fast product delivery to customers across the United States. With facilities located in Canby, Oregon; Portland, Tennessee; Memphis, Tennessee; & Tucson, Arizona, S.R.Smith is committed to serving customers quickly and efficiently.

## EXPANDED **SUPPORT**

The strengthened customer service portfolio includes sales professionals with an average of 15+ years of pool industry experience. Additionally, S.R.Smith provides live phone support from 8:00 a.m. – 8:00 p.m. EST to support customers in all time zones.

## DIVING BOARD CONSTRUCTION (WOOD CORE BOARDS):

### THERE ARE 6 TYPES OF WOOD CORE DIVING BOARD CONSTRUCTION:

- Duro-Beam *aquaBoard* (6', 8', 10')
  - Duro-Spring (6', 8')
  - Techni-Beam (6', 8', 10', 12')
  - Baja (6', 8')
  - Edge *aquaBoard* (6', 8')
  - Olympian (6', 8', 10')
  - Commercial (10', 12', 14', 16')
- } Same Board Construction

### INTER-FAB DIVING BOARD COLOR OPTIONS FOR WOOD CORE BOARDS:

#### DIVING BOARDS:

Standard Colors = Polar White w/White Top Tread OR Linear Blue w/White Top Tread

Custom Colors\* = Black w/Gray Top Tread: -2; Tan w/Tan Top Tread: -7; Gray w/Gray Top Tread: -9

#### PLEASE BE SURE TO ADD CUSTOM COLOR CODE BEHIND PART # WHEN ORDERING.

\* **NOTE:** The 12' Techni-Beam and all Commercial Boards (10', 12', 14', & 16') only available in standard colors.

\*\* The Board to Base Compatibility Chart above refers to standard wood core diving boards and standard fiberglass and steel diving bases.

\*\*\* The Duro-Beam *aquaBoard*™, T7 Diving Board, & Edge *aquaBoard*™ all come ready to pair with a Board Fall tip-end waterfall (sold separately).

\*\*\*\* The Diving System Compatibility Chart above refers to Inter-Fab diving systems only.

**THE T7 & EDGE DIVING SYSTEMS INCLUDE COMPONENTS MANUFACTURED OUT OF ADVANCED COMPOSITE MATERIALS AND ARE DESIGNED TO BE USED EXCLUSIVELY FOR THE T7 & EDGE DIVING SYSTEMS. THEY CANNOT BE INTERCHANGED.**

## DURO-BEAM *aquaBoard™*:

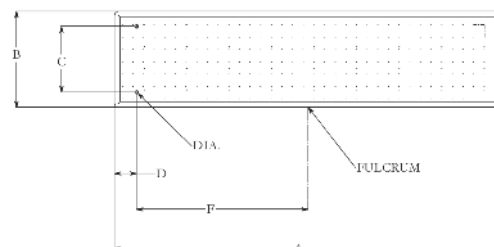

Part # DB6  
Part # DB8  
Part # DB10

### Duro-Beam Features:

- Dual Beam Laminated Core
- Durable Non-Fading, Skid Resistant Acrylic Surface
- Fiberglass Reinforced for Superior Strength
- Ready for Use with Tip End Board Fall Waterfalls
  - 7.5–15 GPM (Actual GPM rating will vary depending on specific pool size and pool equipment used.)
- Weight Limit = 250 lbs.
- See Available Board Colors on Pg. 2

Board Thickness: 1.5"

Optional Waterfall:  
Board Fall

Model #	Nominal Length	Pool Type	Use with Base Type	Colors
DB6	6'	I-V	La Mesa/Los Arcos, U-Stands	White, Blue, Black, Tan, Gray
DB8	8'	II-V	La Mesa/Los Arcos, U-Stands	White, Blue, Black, Tan, Gray
DB10	10'	III-V	La Mesa, U-Stands	White, Blue, Black, Tan, Gray

Model #	Nominal Length	A	B	C	D	F	DIA.
DB6	6'	70.25"	17.25"	12.00"	4.00"	30.00"	19/32"
DB8	8'	94.00"	17.25"	12.00"	4.00"	40.00"	19/32"
DB10	10'	117.50"	17.25"	12.00"	4.00"	52.00"	19/32"

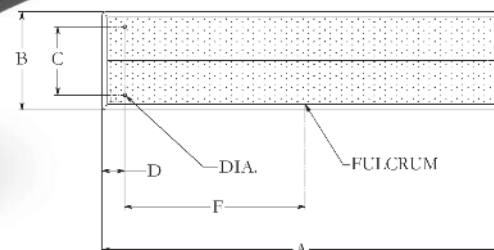

## TECHNI-BEAM BOARD:

Part # TB6  
Part # TB8  
Part # TB10  
Part # TB12

### Techni-Beam Features:

- 14" Wide Solid Laminated Core
- Durable Non-Fading, Skid Resistant Acrylic Surface
- Fiberglass Reinforced for Superior Strength
- Weight Limit = 250 lbs.
- See Available Board Colors on Pg. 2

Board Thickness: 1.5"

Model #	Nominal Length	Pool Type	Use with Base Type	Colors
TB6	6'	I-V	La Mesa/Los Arcos, Techni-Spring, U-Stands	White, Blue, Black, Tan, Gray
TB8	8'	II-V	La Mesa/Los Arcos, U-Stands	White, Blue, Black, Tan, Gray
TB8	8'	III-V	Techni-Spring	White, Blue, Black, Tan, Gray
TB10	10'	III-V	La Mesa, U-Stands	White, Blue, Black, Tan, Gray
TB12	12'	V	U-Stands, Stands by other manufacturers	White, Blue

Model #	Nominal Length	A	B	C	D	F	DIA.
TB6	6'	70.25"	17.25"	12.00"	4.00"	30.00"	19/32"
TB8	8'	94.00"	17.25"	12.00"	4.00"	40.00"	19/32"
TB10	10'	117.50"	17.25"	12.00"	4.00"	52.00"	19/32"
TB12	12'	142.00"	17.25"	12.00"	4.00"	62.00"	19/32"

## DURO-SPRING BOARD:

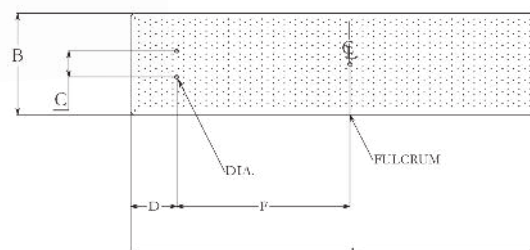

Part # DS6  
Part # DS8

### Duro-Spring Features:

- 12" Wide Laminated Wood Core
- Durable Non-Fading, Skid Resistant Acrylic Surface
- Fiberglass Reinforced for Superior Strength
- Weight Limit = 250 lbs.
- See Available Board Colors on Pg. 2

Board Thickness: 1.5"

Model #	Nominal Length	Pool Type	Use with Base Type	Colors
DS6	6'	I-V	Duro-Spring	White, Blue, Black, Tan, Gray
DS8	8'	III-V	Duro-Spring	White, Blue, Black, Tan, Gray

Model #	Nominal Length	A	B	C	D	F	DIA.
DS6	6'	70.25"	17.25"	4.50"	8.00"	30.00"	19/32"
DS8	8'	94.00"	17.25"	4.50"	8.00"	36.00"	19/32"

## OLYMPIAN BOARD:

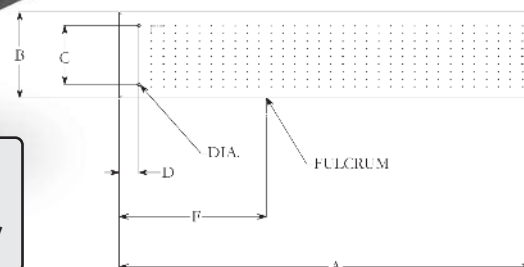

Part # OLY6  
Part # OLY8  
Part # OLY10

### Olympian Features:

- 16.5" Solid Laminated Core
- Durable Non-Fading, Skid Resistant Acrylic Surface
- Fiberglass Reinforced for Superior Strength
- Smooth Resin Finish on Bottom of Board
- Weight Limit = 250 lbs.
- See Available Board Colors on Pg. 2

6' Board Thickness: 1.5"  
8' Board Thickness: 1.75"  
10' Board Thickness: 1.75"

Model #	Nominal Length	Pool Type	Use with Base Type	Colors
OLY6	6'	I-V	La Mesa/Los Arcos, Techni-Spring, U-Stands	White, Blue, Black, Tan, Gray
OLY8	8'	II-V	La Mesa/Los Arcos, U-Stands	White, Blue, Black, Tan, Gray
OLY8	8'	III-V	Techni-Spring	White, Blue, Black, Tan, Gray
OLY10	10'	III-V	La Mesa, U-Stands	White, Blue, Black, Tan, Gray

Model #	Nominal Length	A	B	C	D	F	DIA.
OLY6	6'	70.25"	17.25"	12.00"	4.00"	30.00"	19/32"
OLY8	8'	94.00"	17.25"	12.00"	4.00"	40.00"	19/32"
OLY10	10'	117.50"	17.25"	12.00"	4.00"	52.00"	19/32"

## BAJA JUMP BOARD:

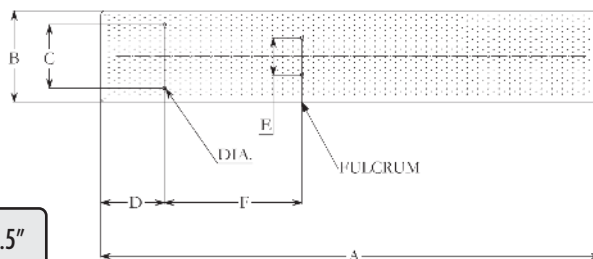

Part # BA6  
Part # BA8

### Baja Jump Board Features:

- 14" Wide Laminated Core
- Durable Non-Fading, Skid Resistant Acrylic Surface
- Fiberglass Reinforced for Superior Strength
- Weight Limit = 250 lbs.
- See Available Board Colors on Pg. 2

Board Thickness: 1.5"

Model #	Nominal Length	Pool Type	Use with Base Type	Colors
BA6	6'	I-V	Baja Jump Stand	White, Blue, Black, Tan, Gray
BA8	8'	III-V	Baja Jump Stand	White, Blue, Black, Tan, Gray

Model #	Nominal Length	A	B	C	D	E	F	DIA.
BA6	6'	70.25"	17.25"	12.00"	12.00"	6.625"	15.00"	19/32"
BA8	8'	94.00"	17.25"	12.00"	12.00"	6.625"	26.00"	19/32"

## EDGE DIVING BOARD:

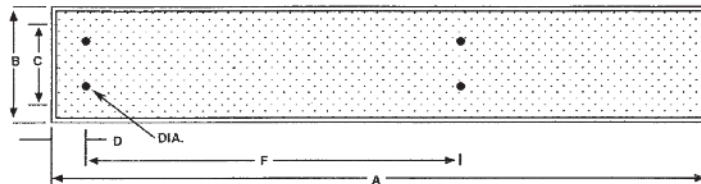

Part # EDGE6  
Part # EDGE8

Optional Waterfall:  
Board Fall

### Edge Jump Board Features:

- Dual Beam Laminated Core
- Durable Non-Fading, Skid Resistant Acrylic Surface
- Fiberglass Reinforced for Superior Strength
- Ready for Use with Tip End Board Fall Waterfall
  - 7.5–15 GPM (Actual GPM rating will vary depending on specific pool size and pool equipment used.)
- Weight Limit = 300 lbs.
- See Available Board Colors on Pg. 2

Board Thickness: 1.5"

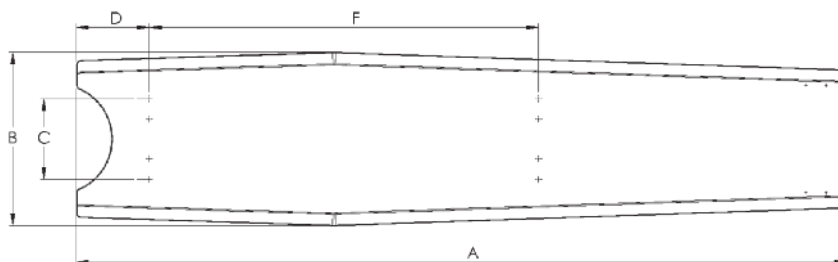

Model #	Nominal Length	Pool Type	Use with Base Type	Colors
EDGE 6	6'	I-V	Edge Base Only	White, Blue, Black, Tan, Gray
EDGE 8	8'	III-V	Edge Base Only	White, Blue, Black, Tan, Gray

Model #	Nominal Length	A	B	C	D	F	DIA.
EDGE 6	6'	70.25"	17.25"	6.31"	4.00"	42.50"	.625"
EDGE 8	8'	94.00"	17.25"	6.31"	9.00"	42.50"	.625"

## T7 DIVING BOARD: FIBERGLASS RESIN TRANSFER MOLDED (RTM) TECHNOLOGY

Part # T7 DB

### T7 Board Features:

- Advanced High-Tech RTM Manufacturing
- Durable Non-Fading, Skid Resistant Surface
- Ready for Use with Tip End Board Fall Waterfall
  - 7.5–15 GPM (Actual GPM rating will vary depending on specific pool size and pool equipment used.)
- Weight Limit = 300 lbs.
- Suitable for Use With Salt Systems
- Matching Products: Landscape Slides, Tables & In-Pool Seating
- Variety of Earth Tones & Gray Colors Available

**Optional Waterfall:**  
Board Fall

### T7 COLORS AVAILABLE:

Tan: -51; Gray: -52; Summit Gray: -53; Mont Blanc: -54; Pebble: -55;  
Fashion Gray: -56; Cappuccino: -57; Autumn Sun: -58; Safari Sunrise: -59;  
Starry Night: -60; and Seashell: -61

**(add custom color code behind board/base part #)**

## DIVING BASES:

### Active Diving Base Features:

- Spring is derived from both the diving base or the diving base springs, and the diving board.
- For users who desire more pronounced spring action.

### Active Diving Bases:

- Duro-Spring - economy base for infrequent to moderate use.
- Techni-Spring - premium base for moderate to frequent use.
- Baja - premium base for moderate to frequent use.
- T7 Diving System - premium proprietary board/base set up for moderate to frequent use.
- Edge Diving System - premium proprietary board/base set up for moderate to frequent use.

### Passive Diving Base Features:

- Spring is derived from the diving board only.
- For pool owners who want a diving board but desire less pronounced spring action.

### Passive Diving Bases:

- U-Stands - economy base for infrequent to moderate use.
- City Base - premium base for moderate to frequent use.
- La Mesa - premium base for moderate to frequent use.
- Los Arcos - premium base for moderate to frequent use.

### DEFINITION NOTE:

When referring to the *INTER-FAB RESIDENTIAL POOL MINIMUM SPECIFICATIONS* chart (table 2 on page 99), please note the following:

**Active Diving Bases  
= Jump Boards**

*NOTE: The T7 Diving System is suitable for use on Type I - Type V pools.*

**Passive Diving Bases  
= Diving Boards**

## INTER-FAB DIVING BASE COLOR OPTIONS FOR STEEL & ACRYLIC BASES:

### ACRYLIC DIVING BASES\*:

Standard Color = White

Custom Colors = Black: -2; Tan: -7; Gray: -9

### STEEL DIVING BASES:

Standard Color = White

Custom Colors = Black: -2; Earth: -3; Copper Vein: -4; Hammertone Gray: -6; Light Gray: -9

**PLEASE BE SURE TO ADD CUSTOM COLOR CODE BEHIND PART # WHEN ORDERING.**

**\*NOTE: The City-6 Base is manufactured in 6' white only.**

# LA MESA BASE:

Part # LAM6 (La Mesa base, 6' jig & hardware)  
 Part # LAM8 (La Mesa base, 8' jig & hardware)  
 Part # LAM10 (La Mesa base, 10' jig & hardware)  
 See page 90 for paver jig info.  
 Compatible with Epoxy Mounting Kit Part # EPX-5

## FEATURES:

- Passive Base - Spring Feature is Derived from Board Only
- Durable & Long Lasting Acrylic & Fiberglass Construction
- Board Fall Compatible Base
- Weight Limit = 250 lbs.
- Available in 6', 8', or 10' Set-Ups
- 2 Hole Drill Pattern 12" on center
- Refer to Board Chart on Pg. 7
- Refer to Available Base Colors on Pg. 7

**Optional Waterfall:**  
Board Fall

## IMPORTANT:

THESE DIMENSIONS ARE ACCURATE ONLY FOR VERTICAL POOL WALLS, **TYPICALLY GUNITE CONSTRUCTION**, WITH LESS THAN A 3' RADIUS TO THE POOL FLOOR.

DUE TO THE VARYING SIZES OF VINYL LINER CONSTRUCTION, IF YOU REQUIRE A JIG PLACEMENT, PLEASE REACH OUT TO OUR CUSTOMER SERVICE TEAM

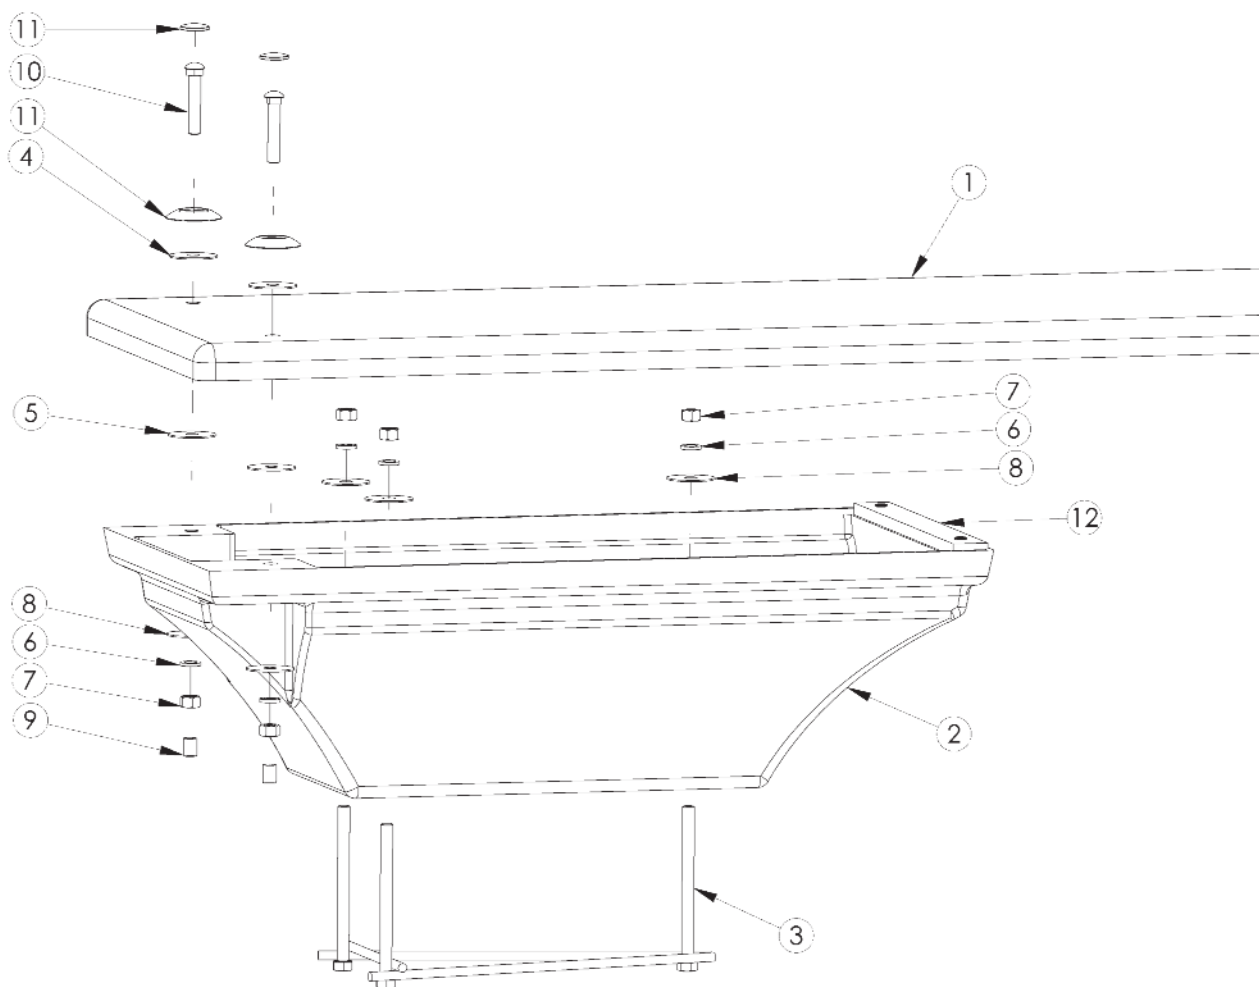

**AT LEAST 24 HOURS PRIOR TO INSTALLATION.** WE REQUIRE THE DRAWING, SIDE VIEW OF POOL, AND WHICH DIVING SYSTEM YOU WILL BE INSTALLING. EMAIL INFORMATION TO CUSTOMERSERVICE@SRSMITH.COM.

**1-800-737-5386**

## NOTES:

DB6WW diving board shown in exploded view for illustration purposes. Must be purchased separately. Other diving board options available. Protective Caps for bolts available in White only.

**DB-TB-M:**  
Board to Base Mounting Hardware

**LM-BK:**  
Base to Jig Mounting Hardware

## LOS ARCOS BASE:

Part # LOS6 (Los Arcos base, 6' jig & hardware)

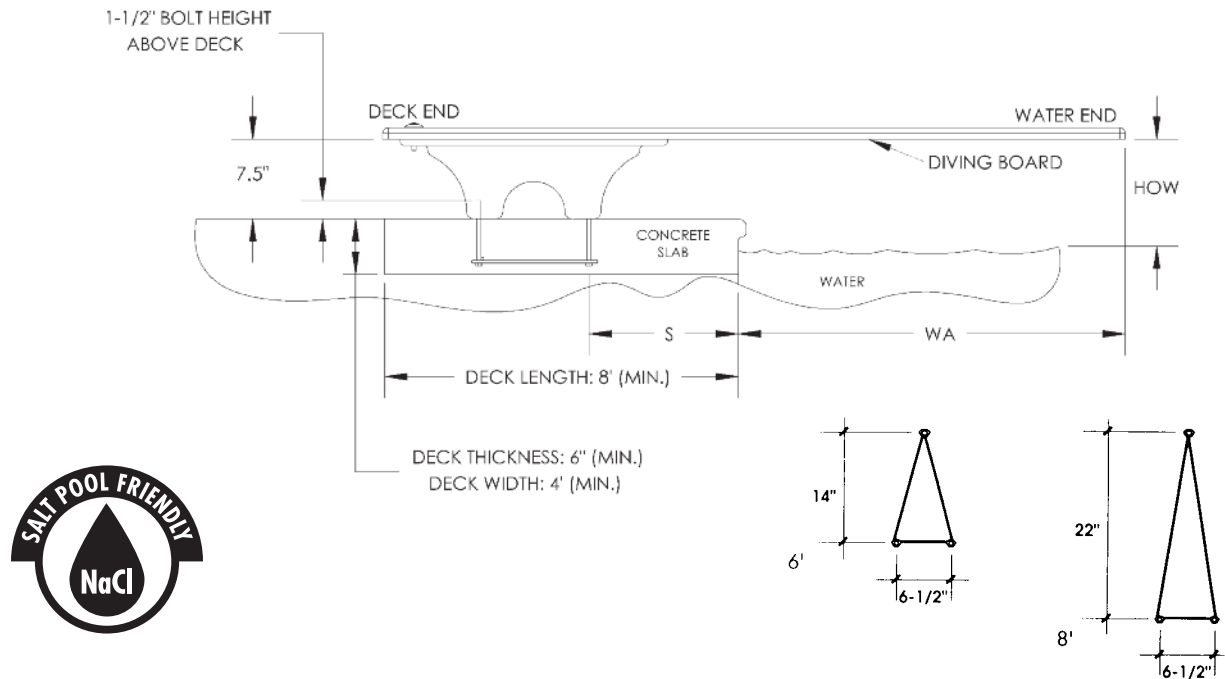

Part # LOS8 (Los Arcos base, 8' jig & hardware)

See page 90 for paver jig info.

Compatible with Epoxy Mounting Kit Part # EPX-5

### FEATURES:

- Passive Base - Spring Feature is Derived from Board Only
- Durable & Long Lasting Acrylic & Fiberglass Construction
- Weight Limit = 250 lbs.
- Available in 6' or 8' Set-Ups
- 2 Hole Drill Pattern 12" on center
- Refer to Board Chart on Pg. 7
- Refer to Available Base Colors on Pg. 7

### IMPORTANT:

THESE DIMENSIONS ARE ACCURATE ONLY FOR VERTICAL POOL WALLS, **TYPICALLY GUNITE CONSTRUCTION**, WITH LESS THAN A 3' RADIUS TO THE POOL FLOOR.

DUE TO THE VARYING SIZES OF VINYL LINER CONSTRUCTION, IF YOU REQUIRE A JIG PLACEMENT, PLEASE REACH OUT TO OUR CUSTOMER SERVICE TEAM

**AT LEAST 24 HOURS PRIOR TO INSTALLATION.**

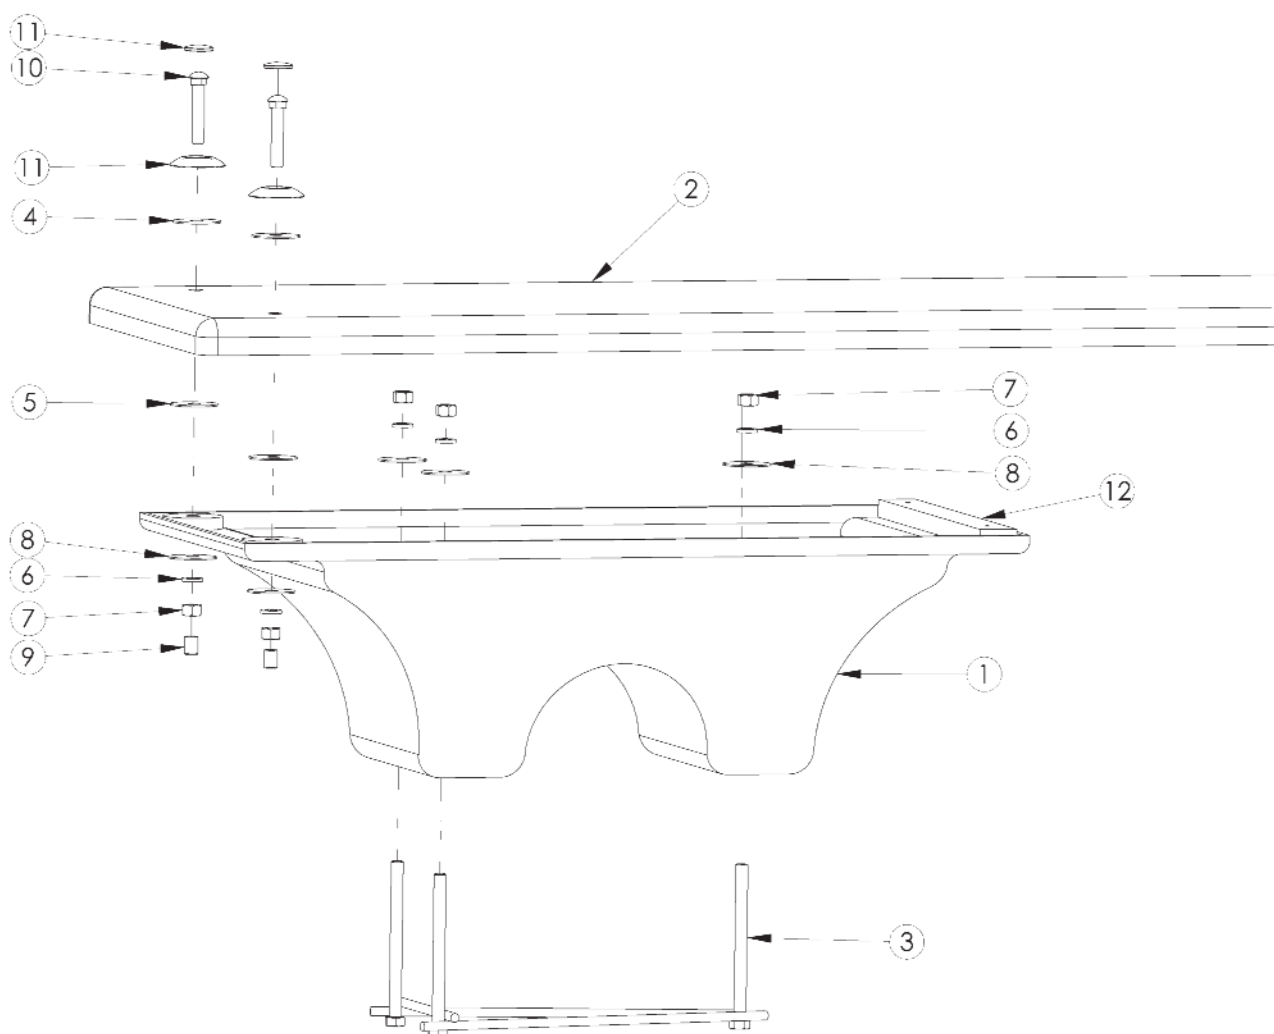

WE REQUIRE THE DRAWING, SIDE VIEW OF POOL, AND WHICH DIVING SYSTEM YOU WILL BE INSTALLING. EMAIL INFORMATION TO CUSTOMERSERVICE@SRSMITH.COM.

**1-800-737-5386**

# T7™ DIVING SYSTEM: FIBERGLASS RESIN TRANSFER MOLDED (RTM) TECHNOLOGY

Part # T7 DB (7' T7 Diving Board)

Part # T7-NBASE (T7 Base & Jig)

Part # T7-NSPRING (T7 Springs)

See page 90 for paver jig info.

**NOTE: Available as Complete Kits**

Compatible with Epoxy Mounting Kit Part # EPX-5

## FEATURES:

- Unique 7' Diving Board Can Be Installed on Type I – Type V Pools
- Durable & Long Lasting Acrylic & Fiberglass Construction with Advanced Composite Springs
- Advanced High-Tech RTM Manufacturing
- Board Fall Compatible Base
- Weight Limit = 300 lbs.
- Variety of Earth Tones & Granite Colors Available
- Suitable for Use With Salt Systems
- *Matching Products:* The T7 Diving System™, Pool/Spa Table™, Pool/Spa Seat™, and Tanning Ledge Tables™ are designed to match the Landscape Slide products perfectly for a complete designer pool look.

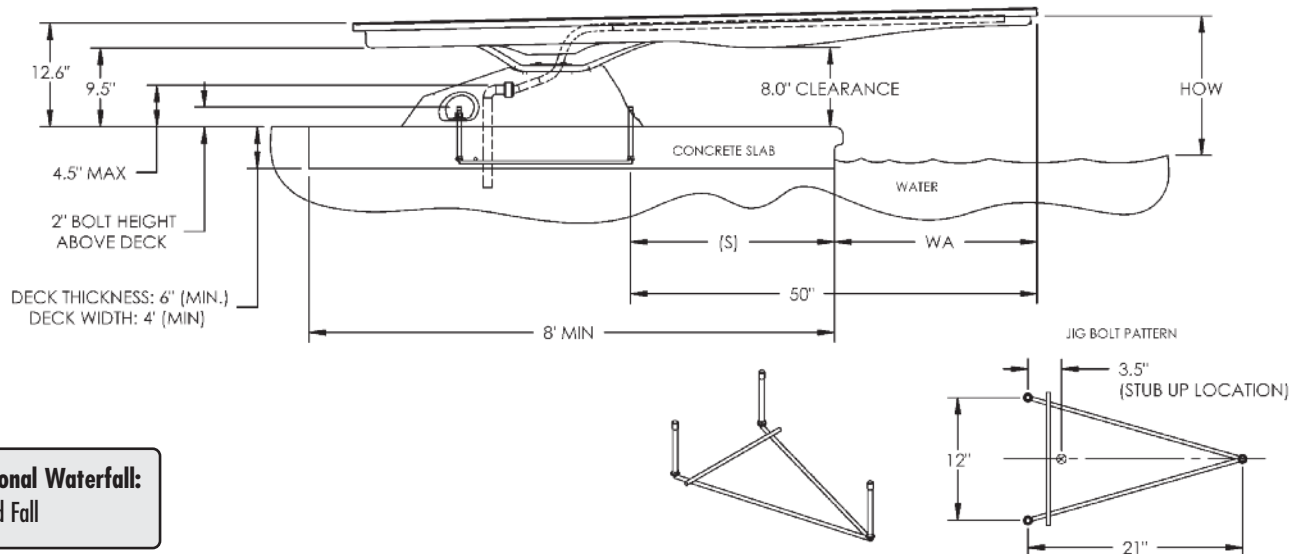

## T7 COLORS AVAILABLE:

Tan: -51; Gray: -52; Summit Gray: -53; Mont Blanc: -54; Pebble: -55;

Fashion Gray: -56; Cappuccino: -57; Autumn Sun: -58; Safari Sunrise: -59;

Starry Night: -60; and Seashell: -61

## LANDSCAPE SLIDES – FIBERGLASS RESIN TRANSFER MOLDED (RTM) TECHNOLOGY: BUILD YOUR OWN SLIDE (BYOS™), RIVER RUN SERIES (RRS™), & GARDEN RIDE SLIDES (GRS™)

The BYOS 1 & 2 slides are **CUSTOM** slides and **must** be ordered by following the quote and design process at Inter-Fab. Phone: 800-737-5386 See pages 110-113 for BYOS quote forms.

The Build Your Own Slide™ (BYOS™) products provide easy slide solutions to builders incorporating handcrafted rock work or concrete formations into custom backyard settings.

### LANDSCAPE SLIDE COLORS AVAILABLE:

Tan: -51; Gray: -52; Summit Gray: -53; Mont Blanc: -54; Pebble: -55; Fashion Gray: -56; Cappuccino: -57; Autumn Sun: -58; Safari Sunrise: -59; Starry Night: -60; and Seashell: -61

### FEATURES:

- Four Collections (BYOS 1, BYOS 2, River Run Series & Garden Ride Series) offer Custom Flume Sections That Can Be Used in Various Combinations (BYOS 1, BYOS 2, River Run Series & Garden Ride Series Parts Are Not Interchangeable)
- Zoom Flume™ Water Delivery System
- Stainless Steel Construction Anchoring System Included with BYOS 1, BYOS 2 & RRS; Optional with GRS
- Stainless Steel Hardware Included
- Earth Tones & Granite Colors Available
- Advanced High-Tech RTM Manufacturing
- BYOS 1 Weight Limit = 250 lbs.
- BYOS 2 Weight Limit = 350 lbs.
- RRS Weight Limit = 350 lbs.
- GRS Weight Limit = 350 lbs.
- Multiple Patents Pending

Check your local electrical code for bonding requirements.

**BYOS 1 & 2 SLIDES:** Customizable by length and shape. (Must pass Inter-Fab safety requirements.)

**RIVER RUN SERIES:** Pre-set BYOS 2 slides available in 19', 23', 24' and 29' lengths; left and right turns available.

**GARDEN RIDE SLIDES:** Pre-set slide configurations available in 7', 10' and 15' lengths; left and right turns available.

### MATCHING PRODUCTS AVAILABLE:

The T7 Diving System, Tables, and In-Pool Seating are designed to match the Landscape Slide products perfectly for a complete designer pool look.

Add on matching products to your pool design to create a custom, color coordinated theme specific to the homeowner's style and décor.

## BYOS 1™ & BYOS 2™ SLIDES:

The BYOS 1 & 2 slides are **CUSTOM** slides and **must** be ordered by following the quote and design process at Inter-Fab. Phone: 800-737-5386

### BYOS 1 & BYOS 2 SLIDE COLORS AVAILABLE:

Tan: -51; Gray: -52; Summit Gray: -53; Mont Blanc: -54; Pebble: -55;  
Fashion Gray: -56; Cappuccino: -57; Autumn Sun: -58; Safari Sunrise: -59;  
Starry Night: -60; and Seashell: -61

BYOS 1 slides are designed for use in residential pool applications.

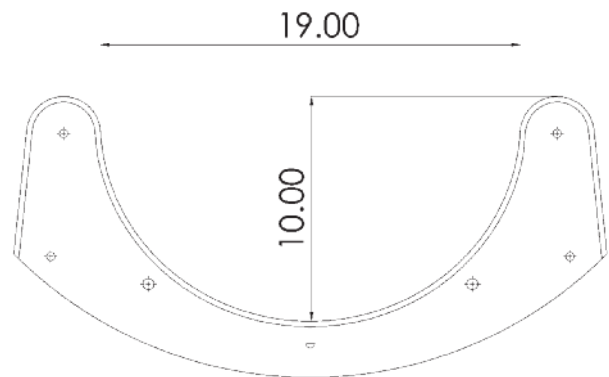

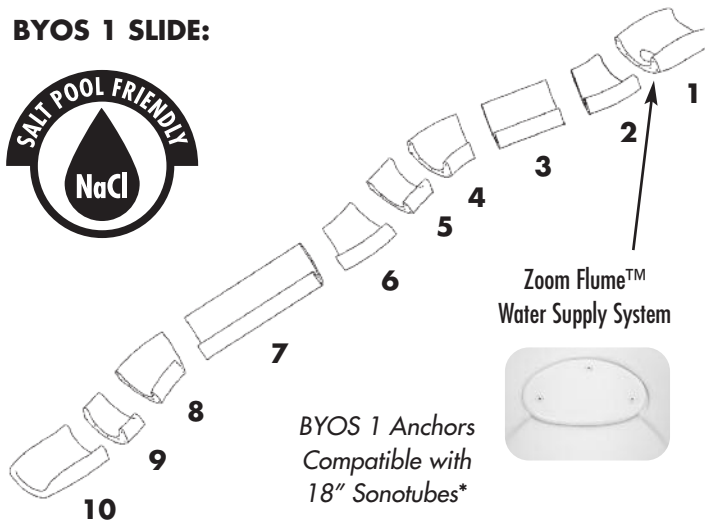

BYOS 2 slides are designed for use in both residential pool applications and commercial pool applications.

Matching Products: The T7 Diving System, Pool/Spa Table, Sun Shelf Tables, and In-Pool Seating are designed to match the Landscape Slide products perfectly for a complete designer pool look.

### BYOS FEATURES:

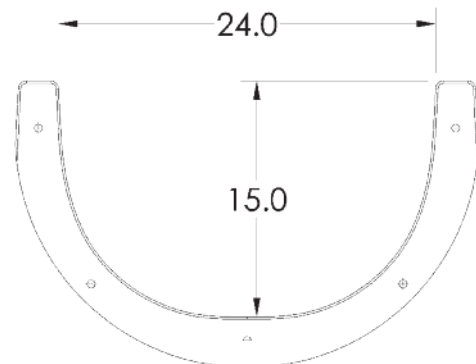

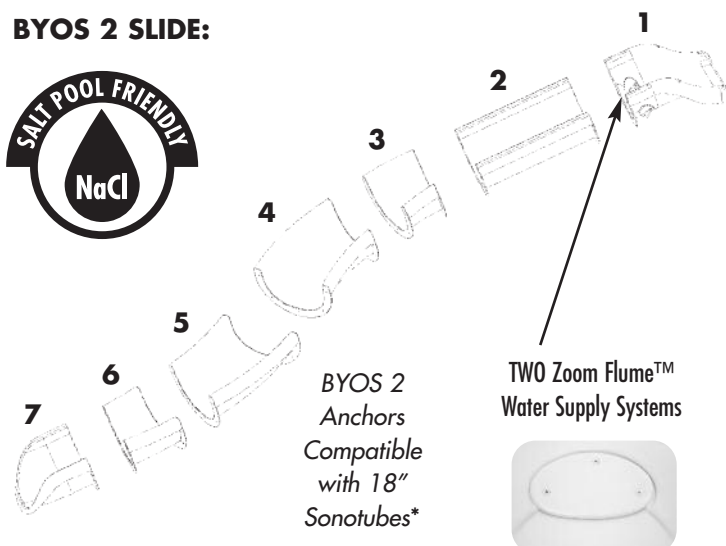

- Collections of Different Flume Sections that can be Used in Various Combinations
- Exclusive Zoom Flume™ Water Delivery System (TWO on BYOS 2 slide)
- Stainless Steel Construction Anchoring System Included
- Stainless Steel Hardware Included
- Optional Handrails Available (Standard on BYOS 2)
- Variety of Earth Tones & Granite Colors Available
- Advanced High-Tech RTM Manufacturing
- BYOS 1 Weight Limit = 250 lbs
- BYOS 2 Weight Limit = 350 lbs.
- BYOS 1 = 20-40 GPM (Actual GPM rating will vary depending on specific pool size and pool equipment used.)
- BYOS 2 = 40-80 GPM (Actual GPM rating will vary depending on specific pool size and pool equipment used.)
- Multiple Patents Pending
- 1 Year Warranty
- See pages 108-111 for BYOS Quote Forms

### BYOS 2 SLIDE:

BYOS 2 Flume Dimensions

\* Refer to the BYOS 1 & 2 installation manual for details.

## RIVER RUN SERIES SLIDES:

**A collection of pre-designed BYOS 2 slides in 19', 23', 24' & 29' linear foot length options.**

### RIVER RUN SERIES SLIDE COLORS AVAILABLE:

Tan: -51; Gray: -52; Summit Gray: -53; Mont Blanc: -54; Pebble: -55;  
Fashion Gray: -56; Cappuccino: -57; Autumn Sun: -58; Safari Sunrise: -59;  
Starry Night: -60; and Seashell: -61

**(add custom color code behind part #)**

BYOS 2 slides are designed for use in both residential pool applications and commercial pool applications.

Matching Products: The T7 Diving System, Pool/Spa Table, Sun Shelf Tables, and In-Pool Seating are designed to match the Landscape Slide products perfectly for a complete designer pool look.

### RIVER RUN SERIES (BYOS 2) FEATURES:

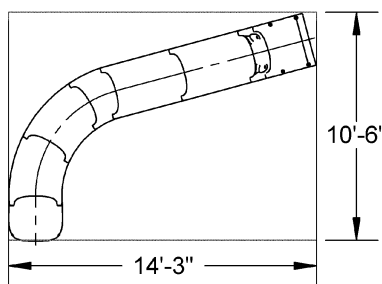

- Pre-Designed BYOS 2™ Slides
- 19', 23', 24' & 29' Linear Foot Length Options
- Each Design Available in Left and Right Turn
- Stainless Steel Anchors Included
- No Quote Process Needed – Easy to Order
- Variety of Earth Tones & Granite Colors Available
- Advanced High-Tech RTM Manufacturing
- BYOS 2 Weight Limit = 350 lbs.
- BYOS 2 = 40-80 GPM (Actual GPM rating will vary depending on specific pool size and pool equipment used.)
- Multiple Patents Pending
- 1 Year Warranty
- See pages 112-113 for River Run Series Product Selection Guide with Part Numbers
- Color Coordinating Products Available:  
T7 Diving System, Tables, & In-Pool Seating

## TRADITIONAL RAILS & LADDERS: OVERVIEW

### FEATURES:

- Durable & Long Lasting Residential .049" wall Stainless Steel Construction (304 SS & 316L)
- Most Rails also Available in Commercial .065" wall Construction (304 SS & 316L)
- Rail Categories:
  - 1) Ladders
  - 2) Stair Rails
  - 3) Handrails
  - 4) Grab/Spa Rails
  - 5) Exercise Bars
- Anchors are not included and recommended.
- **NOTE:** Escutcheons sold separately w/SS products; *included* with powder coated and thermo plastic coated ladders and rails. All measurements on center. *HIP treads for RESIDENTIAL use only.*

**We offer a zinc anode to help protect your rails in more corrosive pool environments.**

The anode can be attached on a ladder near the ladder bumper or on a standard rail near the escutcheon. (Part #ANODE)

### CUSTOM POWDER COATED COLORS FOR ALL RAIL GOODS:

White: -1; Black: -2; Earth: -3; Copper Vein: -4; Hammertone Gray: -6; Light Gray: -9  
(You must add the custom color code behind part # when ordering.) On ALL powder coated rails, the bottom 4" of the stainless steel rail is NOT coated. If you use 3" anchors, a 3" option is available upon request.

### THERMO PLASTIC COATED COLORS FOR ALL RAIL GOODS:

White: -TPC-W; Gray: -TPC-G; Tan: -TPC-T  
(You must add the custom color code behind part # when ordering.) All thermo plastic coated rails are encapsulated in plastic coating and sealed at the ends with plastic caps.

to ensure rail finish availability.

**CUSTOM POWDER COATED COLORS:** White: -1; Black: -2;  
Earth: -3; Copper Vein: -4; Hammertone Gray: -6; Light Gray: -9  
(add custom color code behind part # when ordering)  
**NOTE:** On ALL powder coated rails, the bottom 4" of the  
stainless steel is NOT powder coated. If you use 3" anchors, a  
3" option is available upon request.

**THERMO PLASTIC COLORS:** White: -TPC-W; Gray: -TPC-G;  
Tan: -TPC-T (add custom color code behind part # when ordering)  
**NOTE:** All thermo plastic coated rails are encapsulated in  
plastic coating and sealed at the ends with plastic caps.

**ADA NOTE:** In order to meet the ADA minimum vertical handrail height  
requirement, we are modifying our commercial handrails to be 34" off the deck  
at the TOP of the rail. In the past, we have indicated the on center measurements.  
The following is the requirement under Titles II and III:  
"Section 505.4 Height. Top of gripping surfaces of handrails shall be 34 inches  
(865 mm) minimum and 38 inches (965 mm) maximum vertically above  
walking surfaces, stair nosings, and ramp surfaces. Handrails shall be at a  
consistent height above walking surfaces, stair nosings, and ramp surfaces."  
We are ONLY changing the commercial version of the rails, NOT the residential.

**NOTE:** Escutcheons sold separately w/SS products; included  
with powder coated and thermo plastic coated ladders and rails.

**All measurements on center.**  
Anchors are not included and recommended.

## HANDRAILS – 2 BEND:

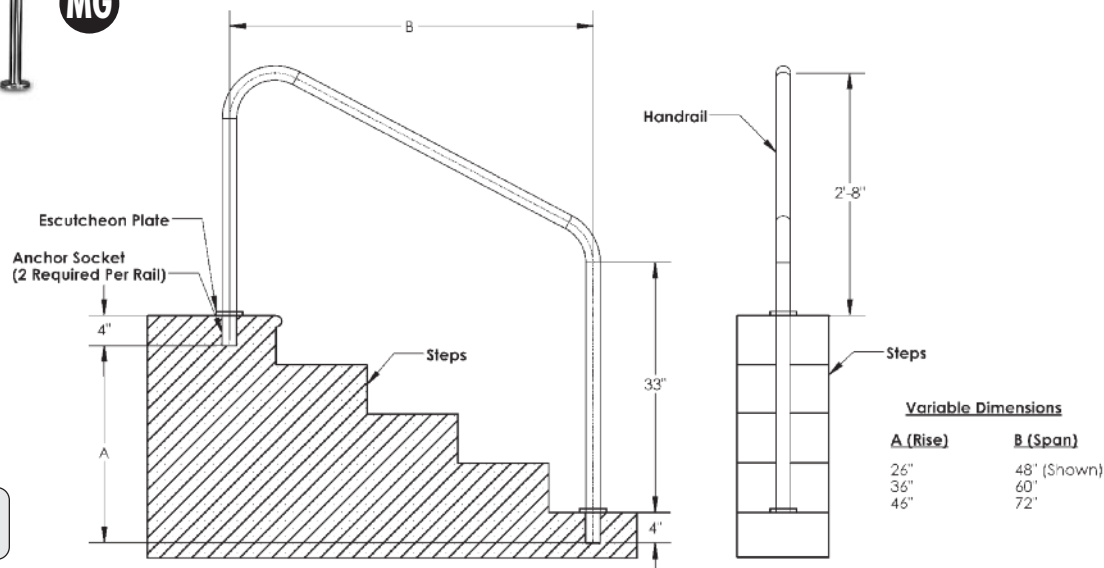

PC  
TP

for vinyl liner anchor  
installation guide.

## PAVER KIT INFO – SELECTED DIVING PRODUCTS

When installing an Inter-Fab diving board and base set up using a paver kit, you must ensure that all standard requirements for a diving board and base installation are met. The diving board and base set up must be compatible with the type of pool on the intended installation and all ANSI/APSP/ICC-5 2011 requirements must be met.

Figure 1 illustrates the standard minimum concrete pad recommended for all Inter-Fab diving board and base set up, which is 4' wide x 8' long x 6" deep.

Figure 2 shows an example side view of a paver jig used in a paver installation. Pavers can be a maximum of 3" thick. Pavers must be mechanically attached to the concrete pad using a setting material (such as mortar or thinset for example) that is no thicker than 3/8".

Refer to Figure 3 to determine how much of the jig needs to be exposed above the final deck surface. You will need to factor in the thickness of your paver (3" MAX.) and the thickness of your setting material (3/8" MAX.) for your individual installation.

**Inter-Fab Inc. will not be responsible for damage to pavers caused by drilling or mechanically attaching to concrete pad.** Refer to paver manufacturer's specific installation instructions before beginning.

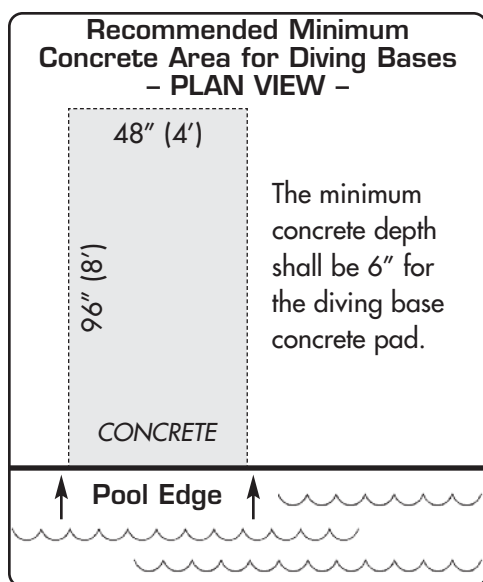

Fig. 1

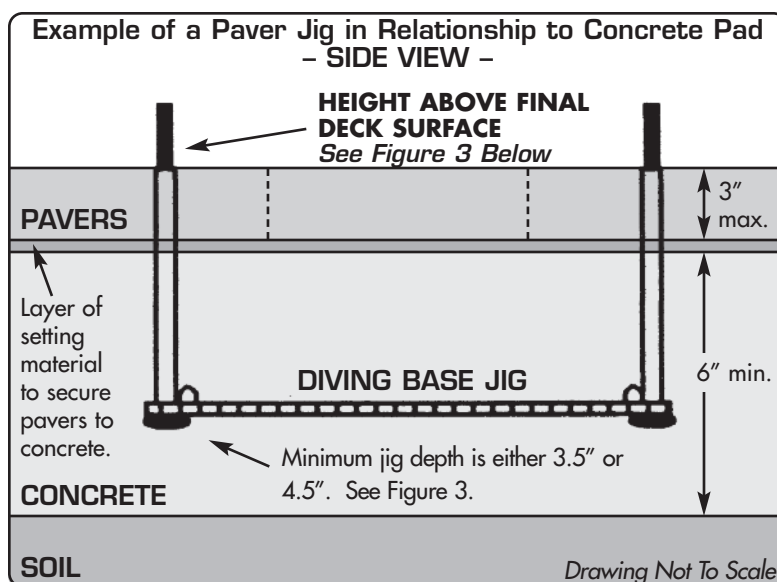

Fig. 2

INTER-FAB DIVING BASE	MIN. JIG DEPTH	PAVER JIG PART NUMBER	PAVER JIG BOLTS	HEIGHT ABOVE FINAL DECK SURFACE

# INTENDED USE INSTRUCTIONS - DIVING PRODUCTS

Inter-Fab diving boards (including spring boards and jump boards) and stands shall be installed only by a professional swimming pool contractor or with the direct supervision of a licensed professional, engineer or architect. Diving boards may be installed only on residential inground swimming pools or commercial pools properly designed for their use.

Diving boards that are improperly installed can be very dangerous to the user resulting in possible serious head and/or spinal column injury, including the paralysis or death of the user.

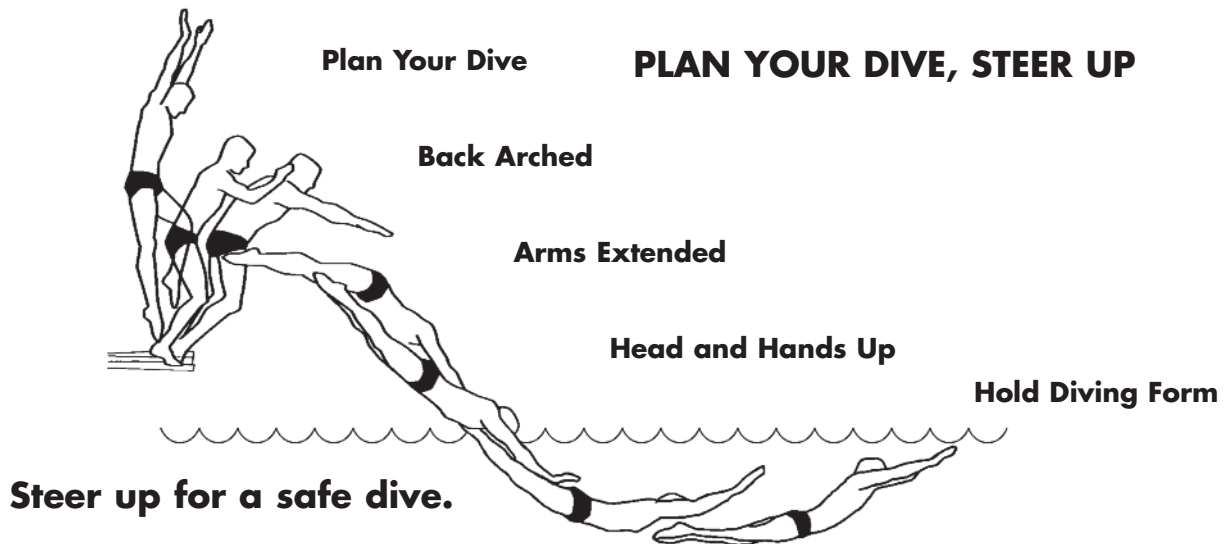

It is very important that Inter-Fab diving boards and stands be installed only on Type 1 or greater pools built in strict accordance with the American National Standard for Residential Inground Swimming Pools (ANSI/APSP/ICC-5 2011) and in accordance with the included INTER-FAB RESIDENTIAL POOL SPECIFICATIONS TABLE 2.

In addition to the above standard and referenced table, the installation instructions provided by Inter-Fab, Inc. must be diligently followed.

It is also important that any and all warnings provided with the diving board be strictly adhered to and posted in a conspicuous location. If not provided or they are misplaced, please purchase warning signs from your pool contractor or professional pool supply store and post them in a location that the users of the diving board can clearly see.

**ONLY ONE PERSON ON THE DIVING BOARD AT ONE TIME.**

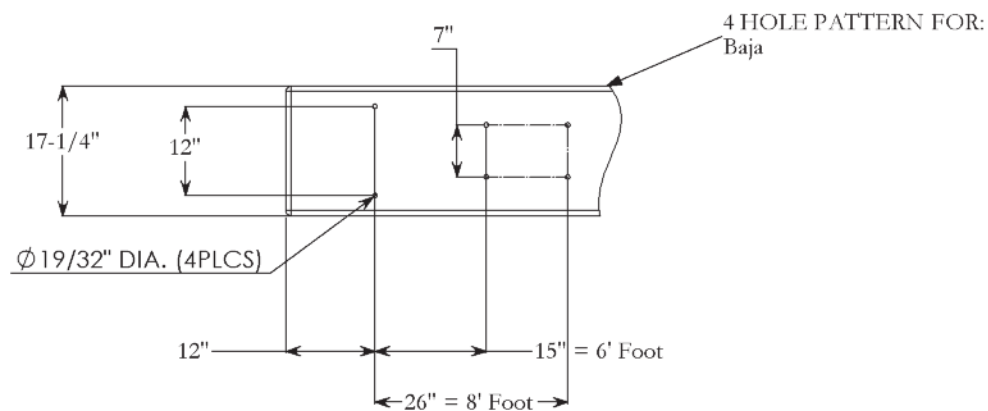

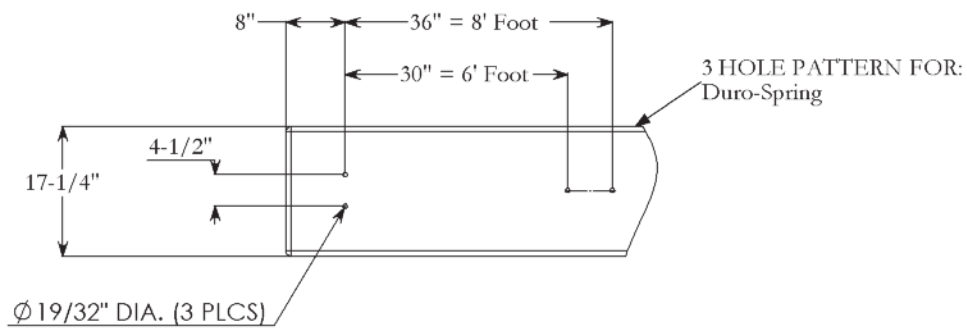

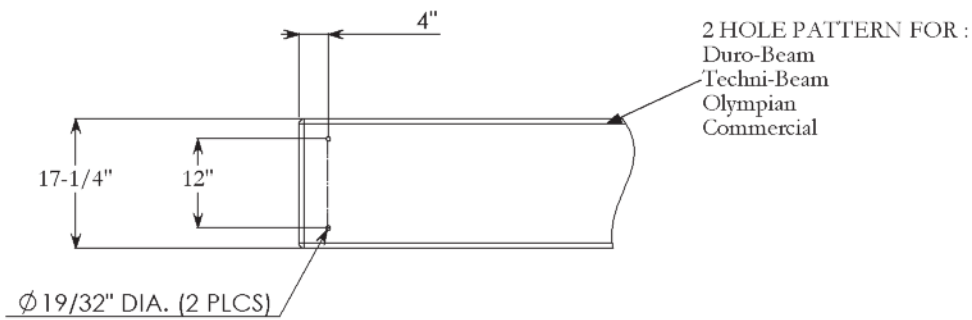

**REFER TO THE POOL TYPE APPLICATIONS AND MAXIMUM WEIGHT LIMIT PROVIDED IN THE CORRESPONDING INSTALLATION MANUAL.**

**DIVING TIPS:** Even the safest equipment must be used properly. Inter-Fab promotes safe diving by offering these tips on the proper use of your diving board: always dive into water that meets depth requirements, with arms extended; be aware of the bottom and the walls of the pool; avoid collisions with pool toys and floats; and instruct your pool users to always "steer up". When you begin your dive you must get ready to steer up. As you enter the water, your arms must be extended over your head, hands flat aiming up. Hold your head and arch your back.

## HOLE DRILL PATTERNS (WOOD CORE BOARDS):

### HOLE PATTERNS FOR WOOD CORE BOARDS:

- 2 Hole Drill Pattern - available on
  - Duro-Beam 6', 8' & 10'
  - Techni-Beam 6', 8', 10' & 12'
  - Olympian 6', 8' & 10'
  - Commercial 10', 12', 14' & 16'
- 3 Hole Drill Pattern - available on
  - Duro-Spring 6' & 8'
- 4 Hole Drill Pattern - available on
  - Baja Jump Board 6' & 8'
- Custom Drill Pattern Available

# DIVING BOARD CUSTOM DRILL PATTERN DIMENSION FORM

Please provide the necessary dimensions needed to make the requested custom drill pattern. Custom drilled boards are non-returnable and carry the same 3 year warranty as Inter-Fab's standard products.

**Pool Professional:** Fax this to your wholesale distributor.

**Wholesale Distribution Only:** Fax to Inter-Fab, Inc. Diving Board Department.

**PLEASE CHECK REQUESTED HOLE PATTERN:** \_\_\_\_ 2 Hole Board\*\* \_\_\_\_ 3 Hole Board \_\_\_\_ 4 Hole Board

\_\_\_\_\_ **A** = Length of Board

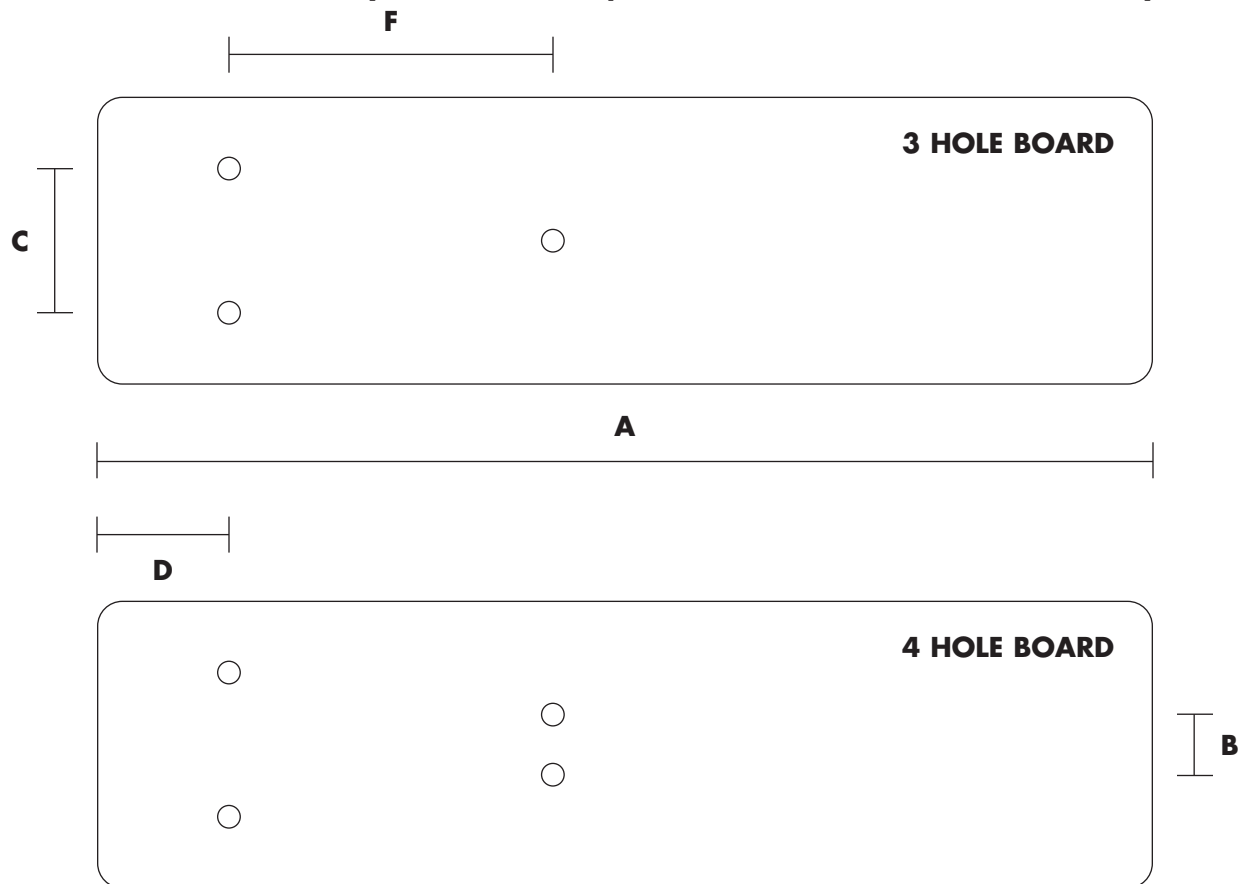

\_\_\_\_\_ **B** = Measurement of Front Holes on Center

\_\_\_\_\_ **C** = Measurement of Back Holes on Center

\_\_\_\_\_ **D** = Measurement of Back Holes to Back End of Board

\_\_\_\_\_ **F** = Measurement Between Back Holes and Front Holes **on Center**

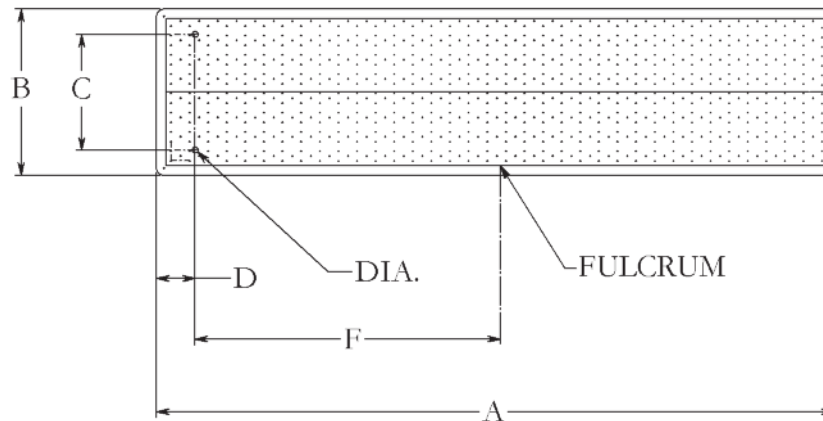

**\*\*For a Custom 2 Hole Board - you will need to provide measurements A, C and D only.**

**Customer Signature** \_\_\_\_\_ **Date** \_\_\_\_\_

**Inter-Fab Inc. 3050 S. Alvernon Way • Tucson, AZ 85713 • 800.737.5386 • 520.514-9089 FAX**

### 5 Pool Dimensions and Tolerances

**5.1 General requirements.** Design dimensions shall comply with the specifications in this standard. The pool shall be constructed to these design dimensions within the tolerances listed in 5.1.1.

**5.1.1 Construction tolerances.** There shall be construction tolerances allowed on dimensional designs. The length, width, and depth shall be limited to a tolerance of plus or minus 3 in. ( $\pm 76$  mm). All other dimensions shall be limited to a tolerance of  $\pm 2$  in. ( $\pm 51$  mm), unless otherwise specified.

**NOTE:** Negative construction tolerances shall not be applied to the shallow area dimensions of the Minimum Diving Envelope given in Table 1, p. 4.

**5.2 Perimeter shape.** No limits are specified for shapes of pools. Consideration shall be given to circulation and safety to the user.

#### 5.3 Walls—Requirements

**5.3.1 Walls in the shallow area and deep area of the pool** shall not slope greater than  $11^\circ$  (5:1 slope ratio) to a transition point of the floor (see Figure 1). The transition to the bottom of the pool between points D and E (see Figure 3, p. 5) shall not be less than 2 ft 3 in. (686 mm) below the waterline.

**5.3.2** As shown in Figure 2, at the depths of (A) and (B), the walls are permitted to continue to join the floor.

Figure 1 Maximum allowable wall slope

## NOTES

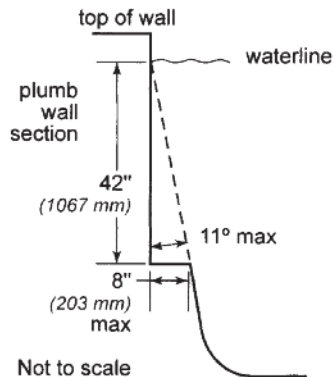

- Minimum length between points CD may vary based upon water depth at point D and the slope between points C and D.
- Drawings are not to scale.
- Negative construction tolerances (see para. 5.1.1) shall not be applied to any of the dimensions shown in the Minimum Water Envelopes given in Table 1.
- Pool types designate minimum water envelope sizes as specified by the diving board manufacturers.

## SUPPORT INFORMATION: ARTICLE 5 – POOL DIMENSIONS AND TOLERANCES

Extracted from ANSI/APSP/ICC-5 2011, American National Standard for Residential Inground Swimming Pools

Figure 4 Offset ledges

### 5.4 Offset Ledges

5.4.1 Offset ledges shall be a maximum of 8 in. (203 mm) wide.

5.4.1.1 Offset ledges located less than 42 in. (1.07 m) below waterline shall be proportionately less than 8 in. (203 mm) wide and fall within 11° from plumb, measured from the top of the waterline (see Figure 4).

5.5 Floor slopes. Floor slopes shall be reasonably uniform and comply with paras. 5.5.1 through 5.5.3.

5.5.1 The slope of the floor from the shallow end wall towards the deep area shall not exceed a 1:7 incline to the point of the first slope change, if any (D–E) as shown in Figure 5.

5.5.2 Changes in slope between shallow and deep areas shall be at a minimum water depth of 2 ft 9 in. (838 mm) and be at least 6 ft (1.83 m) from the shallow end, except as specified in para. 6.3.

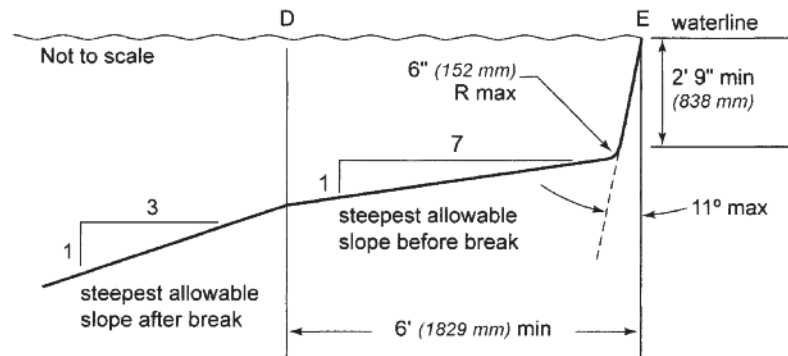

5.5.3 The slope of the floor shall not exceed a 1:3 incline under the lengths (B–D) of the Diving Envelope (see Figure 5).

5.6 Shallow end water depths. Water depth in the shallow area shall be a minimum of 2 ft 9 in. (838 mm), except for those locations specified in para. 6.3 "Shallow End Detail for Beach and Sloping Entries."

5.7 Manufactured diving equipment for in-ground swimming pools (diving board/stand combination, manufactured platform, or field fabricated)

5.7.1 When manufactured or field fabricated diving equipment is installed, it shall conform to the specifications set forth in paras. 5.7–5.9. It shall be located in the deep area of the pool to provide the minimum dimensions as shown in para. 5.8, and shall be installed in accordance with manufacturer's instructions.

Figure 5 Shallow end depths

5.7.1.1 Manufactured or field fabricated diving equipment shall be located directly above Point A. Diving equipment shall not be installed on Type O pools (see Table 1).

5.7.1.2 Maximum elevation of a diving board above the water shall be in accordance with manufacturer's installation instructions. Raised decking may be installed around the diving board up to level with the top of the board.

5.7.2 Manufactured diving equipment installation and use instructions shall be provided by the diving equipment manufacturer and shall specify the minimum water dimensions required for each diving board and diving stand combination. They shall refer to the diving envelope type of their choice by dimensionally relating their products to Point A on the diving envelopes as shown in Figure 3, Table 1, and paras. 5.8.1–5.8.3.

5.7.2.2 Diving equipment shall be permanently labeled and affixed to the diving equipment or jump boards and include, but not be limited to the following:

- manufacturer's diving equipment name and address
- date of manufacture
- minimum diving envelope
- maximum weight limitations.

5.7.2.3 Diving equipment shall have slip-resisting tread surfaces.

5.8 Figure 3 diagrams show dimension points referred to in Table 1.

5.8.1 Point A: Point A is the point from which all other forward dimensions of width, length, and depth are then established for the Minimum Diving Water Envelope. If the tip of the diving board or diving platform overhang is located at a distance of WA or greater from the deep end wall and the water depth at that location is equal to or greater than the water depth requirement at Point A (see Table 1), then the point on the water surface directly below the center of the tip of the diving board or diving platform shall be identified as Point A.

## SUPPORT INFORMATION: ARTICLE 5 – POOL DIMENSIONS AND TOLERANCES

Extracted from ANSI/APSP/ICC-5 2011, American National Standard for Residential Inground Swimming Pools

**5.8.1.2 Location of Point A:** The minimum Diving Water Envelope dimensions for pools with manufactured diving equipment shall be taken from Point A as shown in Figure 3. Point A shall be defined as the point on the water surface where the water depth is required at Point A and is provided at a distance of WA as shown in Table 1 from the deep end wall. The center of the tip of the diving board, platforms, manufactured or field fabricated shall be located directly above Point A.

**5.8.1.3 Point A** as shown in Figure 3 and Table 1 shall be the reference point of origin for all dimensions defining the minimum diving envelope.

**5.8.2 Type O pools** (where diving is prohibited) shall not be limited in width, length, or water depth except as specifically provided for in this standard.

**5.8.3 Location of equipment and pool features in the minimum diving envelope.** If the pool is designed for use with diving equipment, all steps, pool stairs, ladders, underwater benches, offset ledges special features and other accessory items or any parts thereof, these features shall be located outside the Minimum Diving Envelope (see Figure 6).

**5.9 Stationary diving platform(s) and diving rock(s).** Stationary diving platform(s) and diving rock(s) built on site field fabricated shall be allowed to be flush with the wall and located in the diving area of the pool. Point A shall be in front of the wall at the platform or diving rock centerline. **Diving rocks or platforms are prohibited on Pool Type O.**

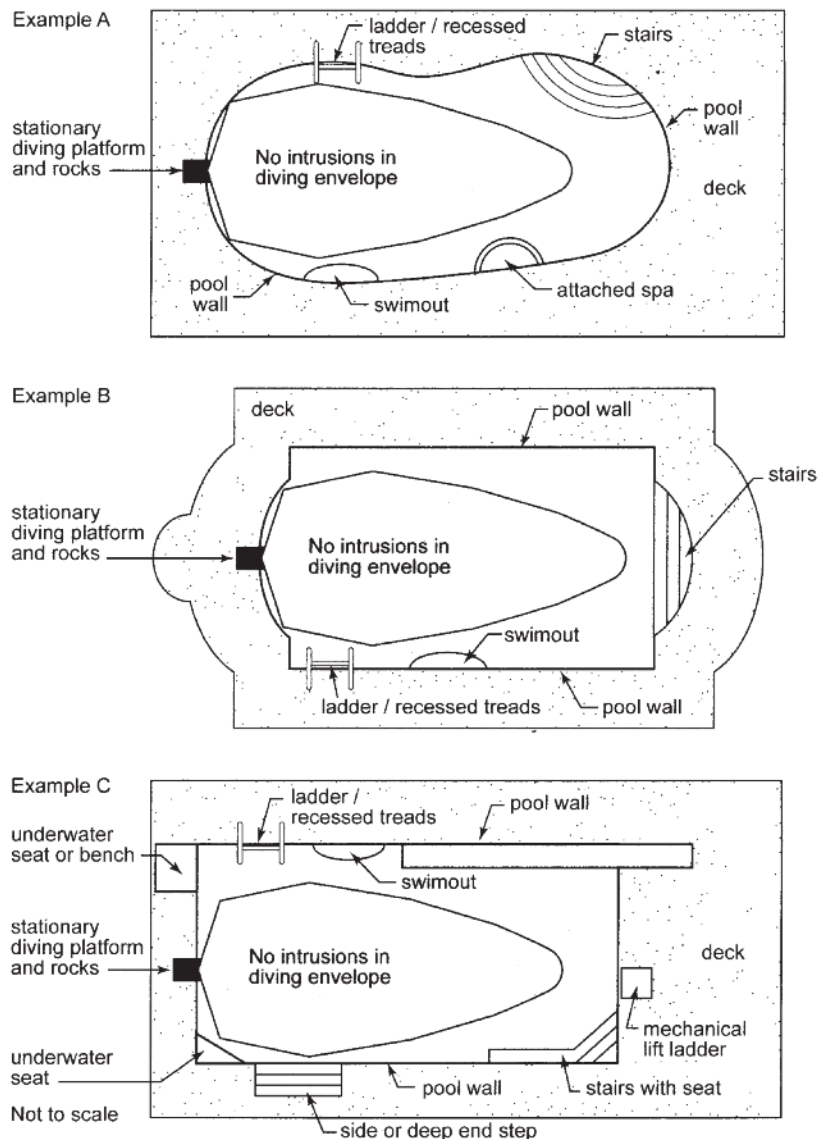

**5.10 Stationary diving platform(s) and diving rock(s)**

**5.10.1** Stationary diving platform(s) and diving rock(s) shall not be permitted on Pool Type O.

**5.10.2** The maximum height of the stationary diving platform or diving rock above the waterline shall be as follows:

Pool Type I	42 in. (1.07 m)
Pool Type II	42 in. (1.07 m)
Pool Type III	50 in. (1.27 m)
Pool Type IV	60 in. (1.52 m)
Pool Type V	69 in. (1.75 m).

**Figure 6 Top view examples of accessory equipment and pool features prohibited in the minimum diving envelope**

**5.10.3** The diving equipment manufacturer shall specify minimum headroom above water.

**5.11 Swimming pool slides**

**5.11.1** Slides, where installed, shall be installed in accordance with the manufacturer's specifications and comply with the U.S. Consumer Product Safety Commission (CPSC) *Standard for Swimming Pool Slides* as published in the *Code of Federal Regulations, 16 CFR Ch. II, Part 1207*.

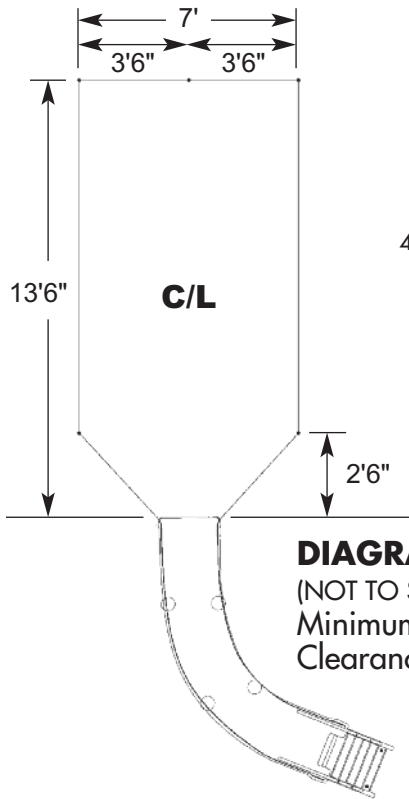

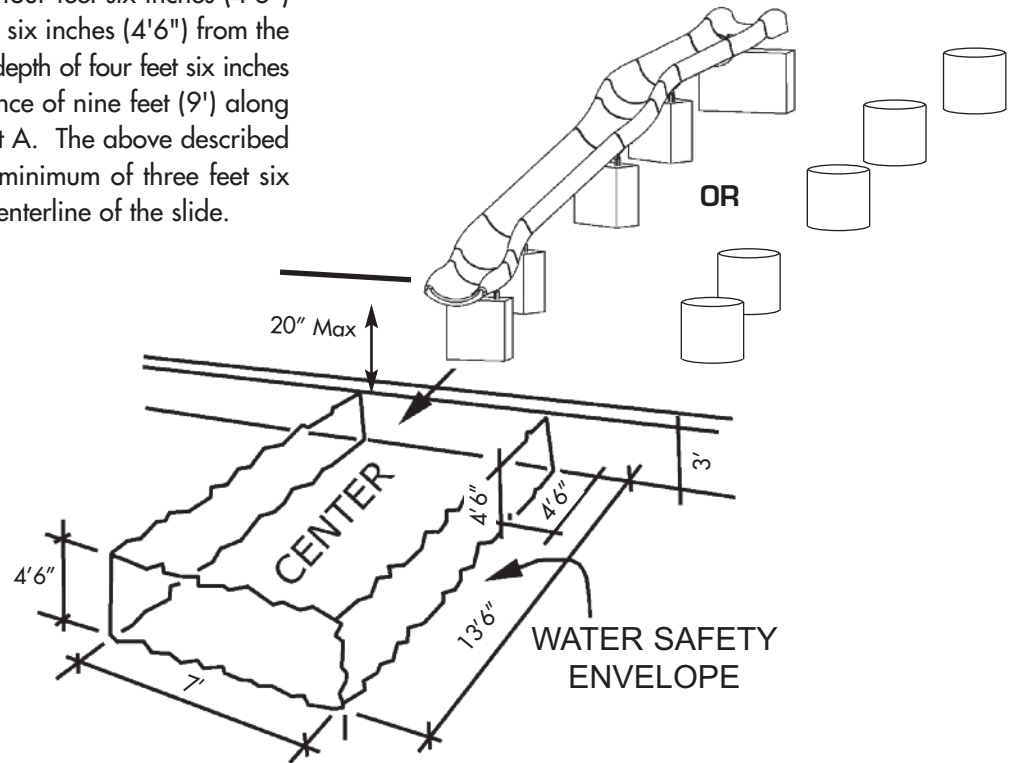

**5.11.2** Slides constructed on-site are not covered by this standard.

## BYOS 1™, BYOS 2™, RIVER RUN SERIES SLIDES

### WATER SAFETY ENVELOPE:

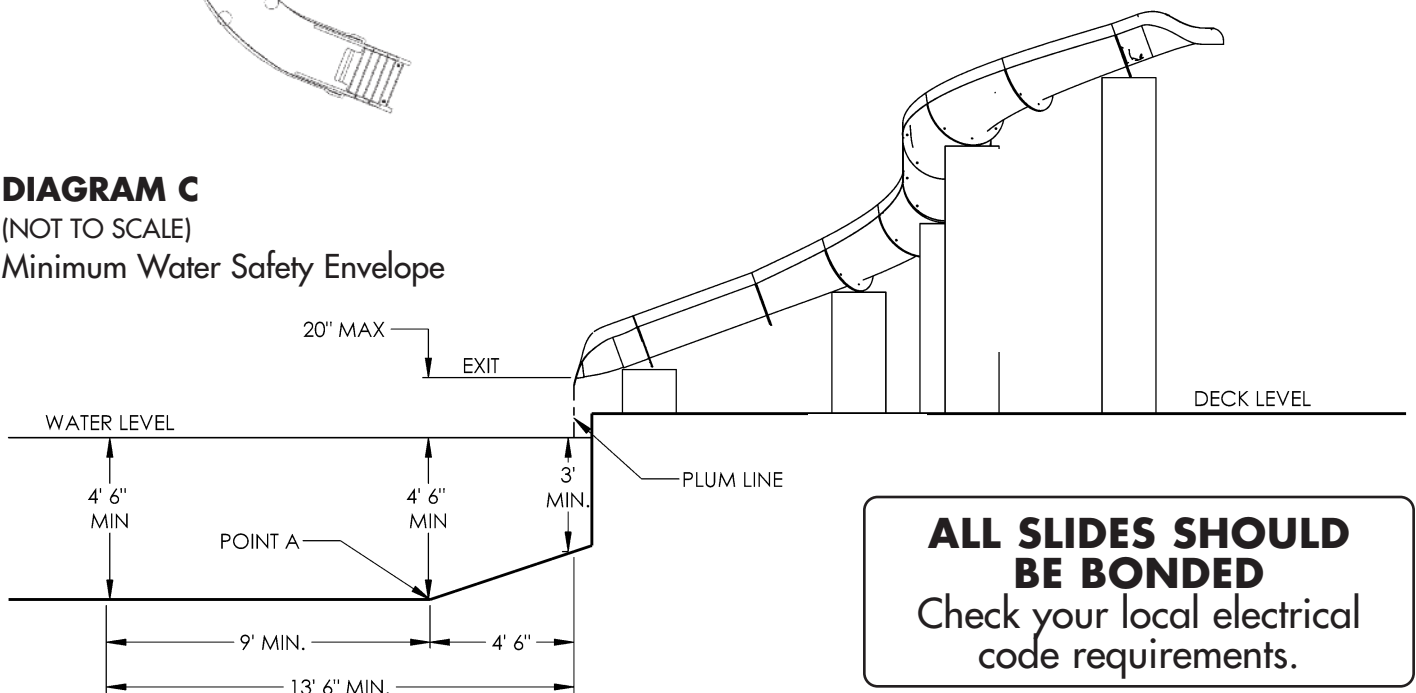

A minimum water depth of three feet (3') under the exit of the slide which increases to a depth of four feet six inches (4'6") at point A which is located four feet six inches (4'6") from the back wall of the pool. A minimum depth of four feet six inches (4'6") must be maintained at a distance of nine feet (9') along the centerline of the slide from point A. The above described water depth profile shall extend a minimum of three feet six inches (3'6") on either side of the centerline of the slide. (See Diagrams A, B & C)

# INTENDED USE INSTRUCTIONS - LANDSCAPE SLIDES

1. Everyone who uses an Inter-Fab landscape slide must know, understand and follow these instructions.
2. The 2013 ANSI/APSP/ICC-4 for above ground pools prohibits the use of slides or diving boards on aboveground pools.
3. Inter-Fab landscape slides are designed for residential inground pool use only. Our slides may not be used on any above ground pool or pools designed for above ground use. Such use of our slide may result in serious injury or death.
4. Inter-Fab landscape slides should never be installed on wood decks, above ground pools, ponds, floating docks or platforms, boat docks or houseboats or any natural body of water.
5. Inter-Fab landscape slides should never be installed on any commercial, public or semi-public pool.\*
6. Be familiar with the shape and depth of the pool before you slide. A slide should only be used with the proper water safety envelope, as described in the installation manual and in accordance with the slide positioning instructions, also described in the installation manual.
7. Because a slide may only be used in water 4'6" deep or greater\*, all slide users must be able to swim in deep water.
8. Weight limit for a landscape slide is 250-350 pounds depending on the slide model, no slider weighing more than the maximum weight limit for any given slide may use the slide.
9. The surface of the slide is very slippery when wet; **USE CAUTION** when entering the slide and when transitioning from standing to sitting.
10. Slide in a feet first sitting position **ONLY**.
11. **IMPORTANT:** sliding headfirst is prohibited: serious spinal injury resulting in paralysis or death can result.
12. Maintain adult supervision at all times.
13. Only one person at a time is allowed on the slide; this includes the ladder.
14. Be sure the water delivery system is on and lubricating the slide prior to use.
15. Collision with another swimmer or a diver can result in serious injury or death for one or both persons: Before sliding, always make sure that the path in front of the slide is free from any (including submerged) obstructions including other people or objects in the pool such as rafts, inner tubes etc. When a diving board is also present, make sure you do not use the slide while someone is on or using a diving board. Take turns.
16. No roughhousing or horseplay should be allowed on the slide at any time.
17. Do not stand, jump or dive from any part of the slide.
18. Do not slide on objects such as rafts or inner tubes. doing so greatly increases your risk of injury.
19. Do not slide through or at objects such as rafts or inner tubes, doing so greatly increases your risk of injury.
20. Do not use a slide if physically impaired or handicapped without your doctor's permission.
21. Do not use a slide with a history of heart conditions, seizures, back problems, fainting or fear of heights.
22. Do NOT use a slide if you are pregnant.
23. Do not drink alcohol and use a slide.
24. Don't take chances, inspect the slide at least once a year. Do not use the slide if any part becomes loose, damaged, weakened or broken. If necessary, before using the slide again, have it inspected and repaired by a competent professional familiar with pool slides.

**Effective August 9, 2018, Inter-Fab is part of S.R. Smith.**  
All products featured in this catalog/guide are available through established channels **except** for the deck mounted pool slides (Adrenaline, City 2, G-Force 2, White Water, Wild Ride, X-Stream 2 and Zoomerang) and Swim Assist Lifts. Please visit [srsmith.com](http://srsmith.com) for information on deck mounted pool slides and pool lifts.

## WARNING: SERIOUS INJURY OR DEATH CAN RESULT FROM THE IMPROPER INSTALLATION OR USE OF A SLIDE.

**When installed according to the slide installation instructions, our slides substantially conform to Consumer Product Safety Standard Guidelines.**

\* These intended use instructions apply to all Inter-Fab landscape slides, with the following exception for the BYOS 2 slide product ONLY. BYOS 2 slides are designed for residential AND commercial applications.

# **RTM PRODUCT MAINTENANCE:**

## **BYOS 1™, BYOS 2™, RIVER RUN SERIES SLIDES, GRS™ SLIDES, & IN-POOL FURNITURE -**

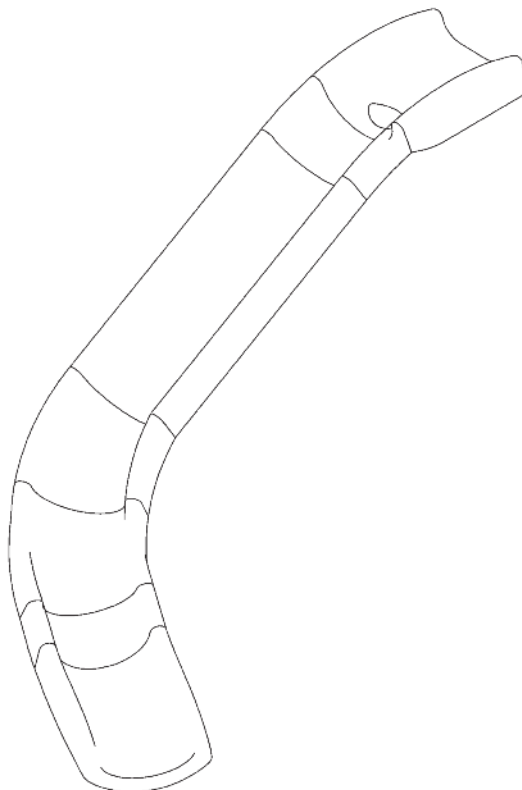

Your Advanced High-Tech RTM Manufactured slide or table/seat requires periodic maintenance to keep it looking like new and protected from the elements.

**Wash slide or table/seat monthly or more frequently if needed using a mild soap and soft cloth. Keep cleaning materials from entering pool.**

- Do not use abrasive cleaners, bleaches, chlorines, high alkaline or strong acidic cleaners.
- Do not use steel wool, wire brushes, metal scrapers, Scotchbrite or other abrasive sponge pads.

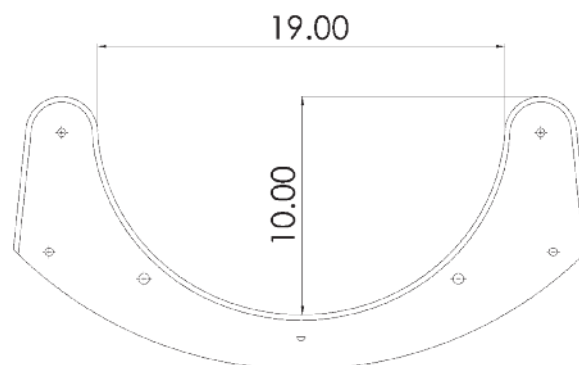

**Keeping the gel coat finish of your slide or table/seat coated with wax - starting when the slide or table is new - is the best way to prolong its life.**

- Choose a wax intended for use on gel coat surfaces. Preferably one designed for use in a Marine environment.
- Test product on small inconspicuous section of slide or table/seat prior to full application.
- While application instructions will vary between brands of wax, in general you apply the wax with a cloth or foam pad using circular motion. Once wax dries to a haze, buff the excess with a soft dry cloth.
- Routine waxing (at least twice a year) will maintain the smooth reflective surface of your slide or table/seat.

BYOS 1 Flume Dimensions

## BYOS 1™ DESIGN CONSIDERATIONS

- In your design, provision must be made for future removal of the slide from the substrate if necessary. Flange/gasket connections must be accessible for inspection and maintenance, including but not limited to retightening of fasteners as the slide can move slightly both vertically and horizontally based on the slider's weight and velocity.
- Do not construct objects or formations along or over the slide pathway that obstruct the pathway for sliders or cause potential harm to the head, arms or legs. Minimum recommended head clearance above the slide pathway is 7 feet.
- Minimum BYOS 1 water envelope is 7' wide (centered on slide) x 13.5' long x 4.5' deep.
- All BYOS 1 products are for residential in ground pool installation and use only. S.R.Smith expressly disclaims any and all warranties and liability arising from the installation or use of its BYOS 1 products in a commercial, non-pool or above ground pool application or setting.
- S.R.Smith will provide you with a slide system which matches the pathway and spatial requirements you request as closely as possible. It is important to note however, that S.R.Smith does not approve or accept liability for BYOS 1 designs. All designs should be checked by a licensed Civil or Structural Engineer in your state, and when necessary inspected/approved by the applicable local governing agency.

*Did you know that you can get a custom colored T7 Diving System to match your custom BYOS?*

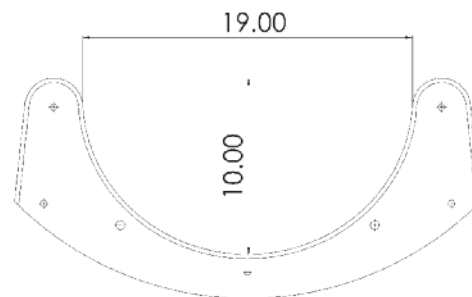

BETTER TOGETHER.

# BYOS 1 QUOTE REQUEST - PART 2

## STEP ONE

1. What is entry height above deck? \_\_\_\_\_
2. What is exit height above deck? \_\_\_\_\_
3. What is the estimated centerline length of runway? \_\_\_\_\_

BYOS 1 Flume Dimensions

## STEP TWO

1. Provide us with a drawing of your slide.  
(Anything from a napkin drawing to an actual CAD drawing will suffice.)  
**Please Note:** Height, slope and actual length of slide will be adjusted as close to your design as possible.  
Actual designs may vary.
2. Choose Slide Color: (pick one)  
Earth Tone Colors: ☐ Tan (-51); ☐ Gray (-52); ☐ Summit Gray (-53)  
Granite Colors: ☐ Mont Blanc (-54); ☐ Pebble (-55); ☐ Fashion Gray (-56); ☐ Cappuccino (-57)  
☐ Autumn Sun (-58); ☐ Safari Sunrise (-59); ☐ Starry Night (-60); ☐ Seashell (-61)

## STEP THREE

1. Decide if you would like optional assist rails and provide appropriate lengths, if applicable.
2. Seating Assist Rails: ☐ Surface Mount 3.5" Flange; ☐ Sub-Surface Mount
3. Climbing Assist Rails: ☐ Surface Mount 3.5" Flange; ☐ Sub-Surface Mount  
Length: ☐ 24"; ☐ 36"; ☐ 48"; ☐ Custom Length \_\_\_\_\_
4. Choose Assist Rail Color: (pick one)  
Standard Colors: ☐ Stainless Steel  
Upgrade Colors: ☐ White (-1); ☐ Earth (-3); ☐ Copper Vein (-4); ☐ Hammertone Gray (-6);  
☐ Light Gray (-9)

## STEP FOUR

BYOS 2 Flume Dimensions

## BYOS 2™ DESIGN CONSIDERATIONS

- In your design, provision must be made for future removal of the slide from the substrate if necessary. Flange/gasket connections must be accessible for inspection and maintenance, including but not limited to retightening of fasteners as the slide can move slightly both vertically and horizontally based on the slider's weight and velocity.
- Do not construct objects or formations along or over the slide pathway that obstruct the pathway for sliders or cause potential harm to the head, arms or legs. Minimum recommended head clearance above the slide pathway is 7 feet.
- Minimum BYOS 2 water envelope is 7' wide (centered on slide) x 13.5' long x 4.5' deep.
- All BYOS 2 products are for in ground pool installation and use only. S.R.Smith expressly disclaims any and all warranties and liability arising from the installation or use of its BYOS 2 products in a non-pool or above ground pool application or setting.
- S.R.Smith will provide you with a slide system which matches the pathway and spatial requirements you request as closely as possible. It is important to note however, that S.R.Smith does not approve or accept liability for BYOS 2 designs. All designs should be checked by a licensed Civil or Structural Engineer in your state, and when necessary inspected/approved by the applicable local governing agency.

*Did you know that you can get a custom colored T7 Diving System to match your custom BYOS?*

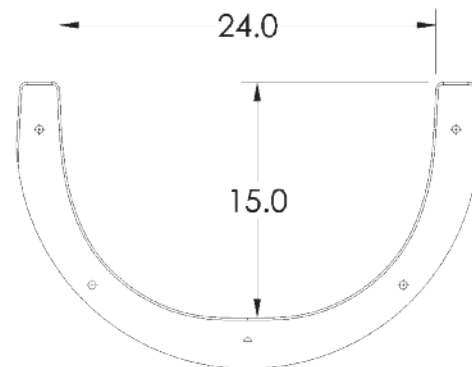

BETTER TOGETHER.

# BYOS 2 QUOTE REQUEST - PART 2

## STEP ONE

1. What is entry height above deck? \_\_\_\_\_
2. What is exit height above deck? \_\_\_\_\_
3. What is the estimated centerline length of runway? \_\_\_\_\_

BYOS 2 Flume Dimensions

## STEP TWO

1. Choose Installation Type: (pick one)  
☐ Residential ☐ Commercial

## STEP THREE

1. Provide us with a drawing of your slide.  
(Anything from a napkin drawing to an actual CAD drawing will suffice.)  
**Please Note:** Height, slope and actual length of slide will be adjusted as close to your design as possible. Actual designs may vary.
2. Choose Slide Color: (pick one)  
Earth Tone Colors: ☐ Tan (-51); ☐ Gray (-52); ☐ Summit Gray (-53)  
Granite Colors: ☐ Mont Blanc (-54); ☐ Pebble (-55); ☐ Fashion Gray (-56); ☐ Cappuccino (-57)  
☐ Autumn Sun (-58); ☐ Safari Sunrise (-59); ☐ Starry Night (-60); ☐ Seashell (-61)

## STEP FOUR

# RAIL MAINTENANCE:

## **STAINLESS STEEL:**

Inter-Fab manufactures pool ladders and rails in 304 or 316L Stainless Steel. These grades of stainless are fairly impervious to swimming pool water that is in balance. However, unbalanced water chemistry and stray electrical current can cause stains and/or rust. Other possible causes are improper electrical grounding, indoor environment, administering chemicals near the rail or ladder, storing your rails and ladders near chemicals, etc.

With proper care and routine maintenance you can extend the life of your stainless steel pool rails and ladders:

1. Regularly inspect your stainless steel products; check for corrosion around mounting hardware and escutcheons. Replace hardware when needed.
2. Rinse off rails and ladders frequently with fresh water to remove chemicals from your pool water and wipe dry with a clean cloth.
3. To clean your stainless steel; first remove the rail or ladder from the pool. Using warm water and gentle soap or detergent and a soft cloth, rub the rail along the polish lines of the steel. Rinse thoroughly.
4. For stubborn stains you may try Brasso® metal polish.
5. You may apply marine grade wax or paste car wax to help protect your rail or ladder from the elements longer.

Do not use steel wool, abrasive cleaners, mineral acids, bleaches or chlorine cleansers on your stainless steel.

## **POWDER COATED STAINLESS STEEL:**

1. Regularly inspect your pool products; check for corrosion around mounting hardware and escutcheons. Replace hardware when needed.
2. To clean your powder coated products; first remove the rail or ladder from the pool. Using warm water and gentle soap or detergents, wash the finish with a soft cloth. Rinse thoroughly with cold water.
3. For stubborn stains repeat step 2 and use a soft sponge to gently scrub away dirt. Do not use abrasive cleaners, scouring pads or other items that can cause damage to the powder coat.
4. For nicks and scratches you can purchase a touch up kit to apply to cleaned exposed stainless steel.

## **THERMO PLASTIC COATED STAINLESS STEEL:**

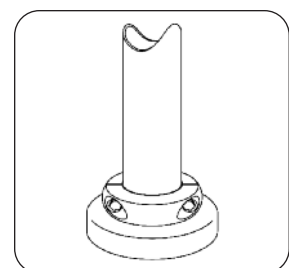

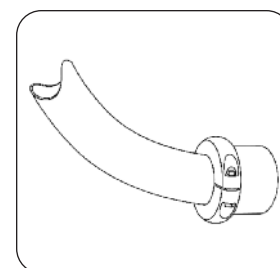

1. Regularly inspect your pool products; check for corrosion around mounting hardware and escutcheons. Replace hardware when needed.
2. To clean your thermo plastic coated products; first remove the rail or ladder from the pool. Using warm water and gentle soap or detergents, wash the finish with a soft cloth. Rinse thoroughly with cold water.
3. For stubborn stains repeat step 2 and use a soft sponge to gently scrub away dirt. Do not use abrasive cleaners, scouring pads or other items that can cause damage to the powder coat.

***WE OFFER A ZINC ANODE TO HELP PROTECT YOUR RAILS IN MORE CORROSIVE POOL ENVIRONMENTS.***

The anode can be attached on a ladder near the ladder bumper or on a standard rail near the escutcheon.

(Part #ANODE)

## INTER-FAB BRONZE OR PLASTIC ANCHOR SOCKET INSTALLATION (IN DECK)

### NEW CONSTRUCTION INSTALLATION USING IN DECK ANCHOR SOCKETS:

#### *Installing Anchors in the Deck*

Determine the correct positioning of each product around the pool. Confirm the maximum/minimum distance from water's edge and the correct span between anchors if using two for installation.

- First inspect the anchors for defects or missing pieces.
- For plastic anchors make sure the bonding screw is flush with the inside of the anchor.
- Using tool, lower the wedge within the anchor by turning the bolt counterclockwise. To allow maximum clearance for the product, drop the wedge as far as you can without disengaging the wedge from the bolt.
- Slip the anchor(s) onto the product to confirm fit.
- Tape/Cover the anchor socket and the hole in the bottom of the anchor to keep concrete out.
- Check your local electrical code to determine bonding requirements. Bond anchor in accordance to code.
- Make sure the top edge of the anchor is flush with the concrete surface.
- Check that the anchor is level and plumb – critical for proper installation of product.
- Use concrete with a minimum compression strength of 3,000 PSI. Following concrete manufacturer's instructions; allow the concrete to fully cure prior to installing product.

#### *Installing Product in Anchor Sockets*

- Using tool, lower the wedge within the anchor by turning the bolt counterclockwise. To allow maximum clearance for the product, drop the wedge as far as you can without disengaging the wedge from the bolt.
- Gently slide product into anchor(s).
- **INSTALLATION TIP:** To avoid damage to finish and ease of installation use two or more people to install large span rails and rails with 8" on center spans. Ensure both ends of the rail are lined up plumb with the anchor and insert both ends at the same time.
- Using tool, tighten wedge anchor by turning the bolt clockwise to secure the product in the anchor. Do not over tighten.

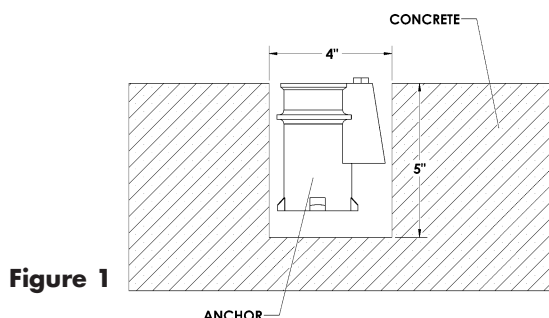

### IN DECK RETROFIT INSTALLATION USING IN DECK ANCHOR SOCKETS:

#### *Installing Anchors in the Deck*

You may install Inter-Fab Bronze or Plastic anchor sockets in existing concrete. The integrity of the concrete is essential to the rigidity/security of the product being installed. Professional installation is recommended.

Determine the correct positioning of each product around the pool. Confirm the maximum/minimum distance from water's edge and the correct span between anchors if using two for installation.

- First inspect the anchors for defects or missing pieces.
- For plastic anchors make sure the bonding screw is flush with the inside of the anchor.
- Using tool, lower the wedge anchor by turning the bolt counterclockwise. Drop the wedge as far as you can without disengaging the wedge from the bolt.
- Slip the anchor(s) onto the rails to confirm fit.
- Mark and drill a minimum 4" diameter hole at least 5" deep. **(See Figure 1)**

**Figure 1**

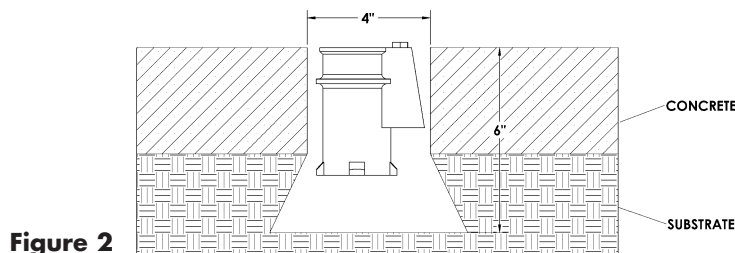

**INSTALLATION TIP:** The center of the anchor is not the center line for the product, measure correctly to keep center line measurements the correct distance apart.

- Do not make holes larger than necessary or escutcheons may not cover the installation.
- Use a pry bar or sledge hammer to break the core pieces from the base of the hole.
- Clean all debris from inside the hole, check the depth and insert the anchor to ensure proper fit.
- Check your local electrical code to determine bonding requirements. Bond anchor in accordance to code.
- Cover the hole in the bottom of the anchor with tape to keep concrete out.
- Use concrete or anchoring epoxy, mix to manufacturer's instructions.

## IN DECK RETROFIT INSTALLATION USING IN DECK ANCHOR SOCKETS (CONT.)

- Fill area around the anchor with mixture.
- Make sure the top edge of the anchor is flush with the concrete surface.
- Check that the anchor is level and plumb – critical for proper installation of product.
- Allow the concrete or epoxy to fully cure prior to installing product.

If the depth of the existing concrete is less than the required 5" depth, remove the fill material below the concrete to obtain 6" depth. The diameter of the hole below the concrete should be slightly larger than the core hole. **(See Figure 2)**

### PERMANENT CONCRETE INSTALLATION:

Some Inter-Fab rails can be mounted directly into the concrete deck. These rails have a hole drilled through the bottom of each support leg, 1-1/2" up from the end of the rail.

- Place a 6" long piece of #3 rebar through the hole on each support leg. Determine the correct positioning of product around the pool. Confirm the maximum/minimum distance from water's edge.
- Check your local electrical code to determine bonding requirements. Bond anchor in accordance to code.
- Support the product as the concrete is poured and during cure time.

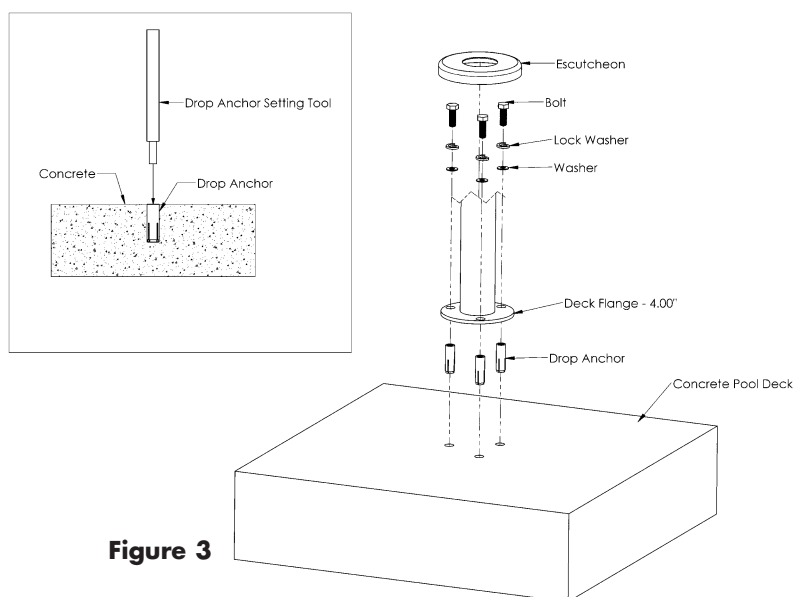

### SPECIAL AFTER MARKET DECK TOP MOUNTED RAIL INSTALLATION:

Determine the correct positioning of each product around the pool. Confirm the maximum/minimum distance from water's edge.

- Check your local electrical code to determine bonding requirements. Bond rail or flange in accordance to code.
- With a marker, mark the 3 flange hole locations for each flange.
- Using a 1/2" masonry bit and hammer drill, drill each hole 1-9/16" deep. Do not drill further down than 1-9/16" deep. Drop in anchors must NOT extend above deck.

**INSTALLATION TIP:** Measure 1-9/16" on 1/2" drill bit and mark it with a piece of tape or marker so each hole is drilled to the correct depth.

- Place anchor in hole and tap until flush with concrete.
- Expand anchor with setting tool provided. Anchor is properly expanded when shoulder of setting tool is flush with top of anchor.
- Align product flanges with anchors.
- Secure product with flat washer, lock washer and 1" bolt. **(See Figure 3)**

# INTER-FAB VINYL LINER 1.90" ANCHOR INSTALLATION HELP GUIDE

## DESIGNED FOR USE IN VINYL LINER POOLS

**For Use With All Inter-Fab, Inc.  
16" and 30" Tables and 16" Seats**

### INTENDED USE INSTRUCTIONS:

- For use **ONLY** with Inter-Fab 16" or 30" Tables or Seats.
- For use **ONLY** in vinyl liner pools.
- **TO AVOID ENTRAPMENT DO NOT INSTALL NEAR WALLS OR OTHER OBJECTS WHERE THERE WILL NOT BE SUFFICIENT CLEARANCE WHEN USED WITH A 16" OR 30" DIAMETER TABLE OR SEAT.**

## WARNING

### IMPORTANT INSTALLATION INFORMATION

The installation of this product should be done only by a licensed and professional installer. Installation should be done strictly in conformance with all local building codes, electrical codes and other building and safety laws and regulations. Among other things, that your installer should carefully analyze the need to bond the product to prevent an electrical hazard. Failure to properly install this product could result in a dangerous condition, including but not limited to electrical or structural hazards. Inter-Fab disclaims all liability arising from the installation and the user assumes all risk associated with the installation.

# INTER-FAB VINYL LINER 1.90" ANCHOR INSTALLATION HELP GUIDE – *CONTINUED*

## MINIMUM CONCRETE POUR DIMENSIONS:

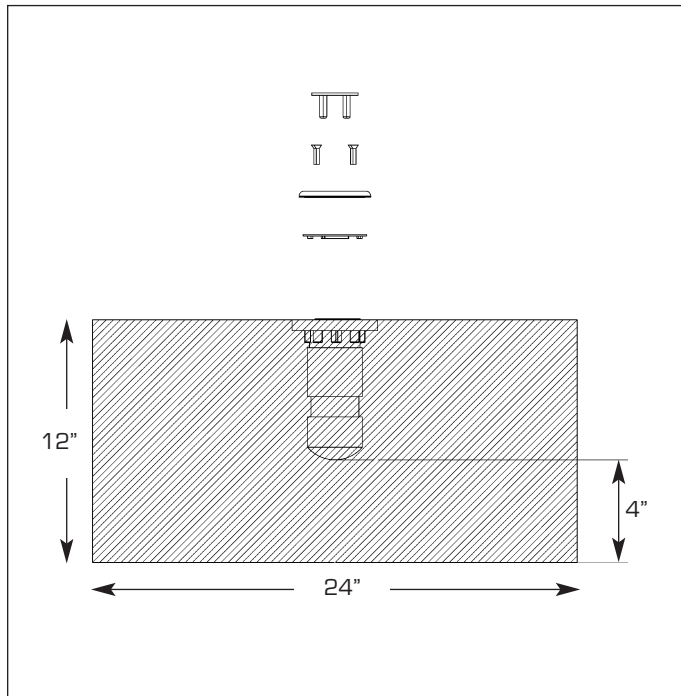

Figure 1

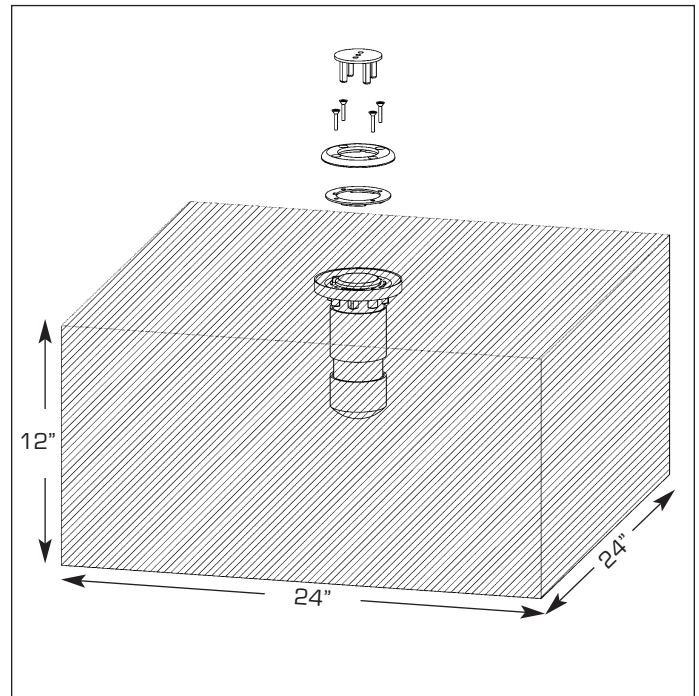

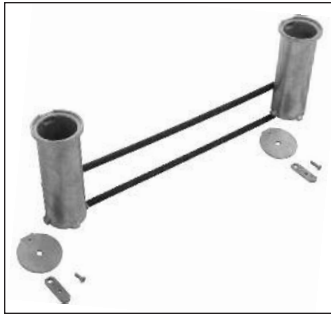

Figure 2

## INSTRUCTIONS:

- **CHECK YOUR LOCAL ELECTRICAL CODE FOR BONDING REQUIREMENTS.**
- Locate suitable location for anchor installation. Allow sufficient clearance for use of either the 16" or 30" diameter tables and seats.
- Anchor must be set in concrete in a minimum size pour of 24" L x 24" W x 12" D, allowing a minimum thickness below anchor of 4".
- Make sure the anchor is level and the top of the body is flush with the top of the concrete. **(insure no concrete gets into the body during pour)**
- When concrete is cured, install gasket, liner and faceplate per manufacturer's specifications.
- Use included cap when anchor is not being used.
- **NOTE: Install black plastic cap on anchor end of support pole to prevent damage to pool vinyl liner.**
